

# Fact Book | 2013

## Preface *Fact Book 2013*

---

The Office of the Executive Vice President for Academic & Research Affairs is pleased to introduce the twentieth edition of The University of Texas Health Science Center at Houston's (UTHealth) annual *Fact Book*.

Data, where appropriate, align with:

- The university's Annual Financial Report;
- Certified Texas Higher Education Coordinating Board reports (enrollment, degrees conferred, faculty, medical residents);
- Performance Measures reported to the Legislative Budget Board; and/or
- Other State and UT System required reports (financial aid, research expenditures, facilities, philanthropy)

Most tables portray FY 2012 data, which covers the period of September 1, 2011 – August 31, 2012. Enrollment and Employee figures are as of October 2012 and organization charts are current as of press time. Table titles will indicate the date(s) covered.

### UTHealth Mission Statement

---

As a comprehensive health science university, the mission of The University of Texas Health Science Center at Houston is to educate health science professionals, discover and translate advances in the biomedical and social sciences, and model the best practices in clinical care and public health.

We pursue this mission in order to advance the quality of human life by enhancing the diagnosis, treatment, and prevention of disease and injury, as well as promoting individual health and community well-being.

### UTHealth Vision Statement

---

***Excellence above all*** in the quest to be an acknowledged leader in the collaboration to treat, cure and prevent the most common diseases of our time through education, research and clinical practice.

---

## The University of Texas Board of Regents

---

source: <http://utsystem.edu/board-of-regents/current-regents>

The Board of Regents, the governing body for The University of Texas System, is composed of nine members who are appointed by the Governor and confirmed by the Senate. Terms for Regents are scheduled for six years each and staggered so that three members' terms will usually expire on February 1 in odd-numbered years. In addition, the Governor appoints a Student Regent for a one-year term that expires on May 31.

Throughout the more than 100-year history of The U. T. System, the Board has been composed of dedicated and distinguished Texans who have been strong advocates of excellence in academic programs, scientific inquiry, and responsible public service.

### **Officers:**

Wm. Eugene "Gene" Powell, Chairman

Paul L. Foster, Vice Chairman

R. Steven "Steve" Hicks, Vice Chairman

James D. Dannenbaum, PE, Vice Chairman

---

Francie A. Frederick, General Counsel to the Board of Regents

### **Members with term set to expire February 1, 2013**

James D. Dannenbaum, PE

Paul L. Foster

Printice L. Gary

### **Student Regent with term to expire May 31, 2013**

Ashley Purgason

### **Members with term set to expire February 1, 2015**

R. Steven "Steve" Hicks

Wm. Eugene "Gene" Powell

Robert L. Stillwell

### **Members with term set to expire February 1, 2017**

Alex M. Cranberg

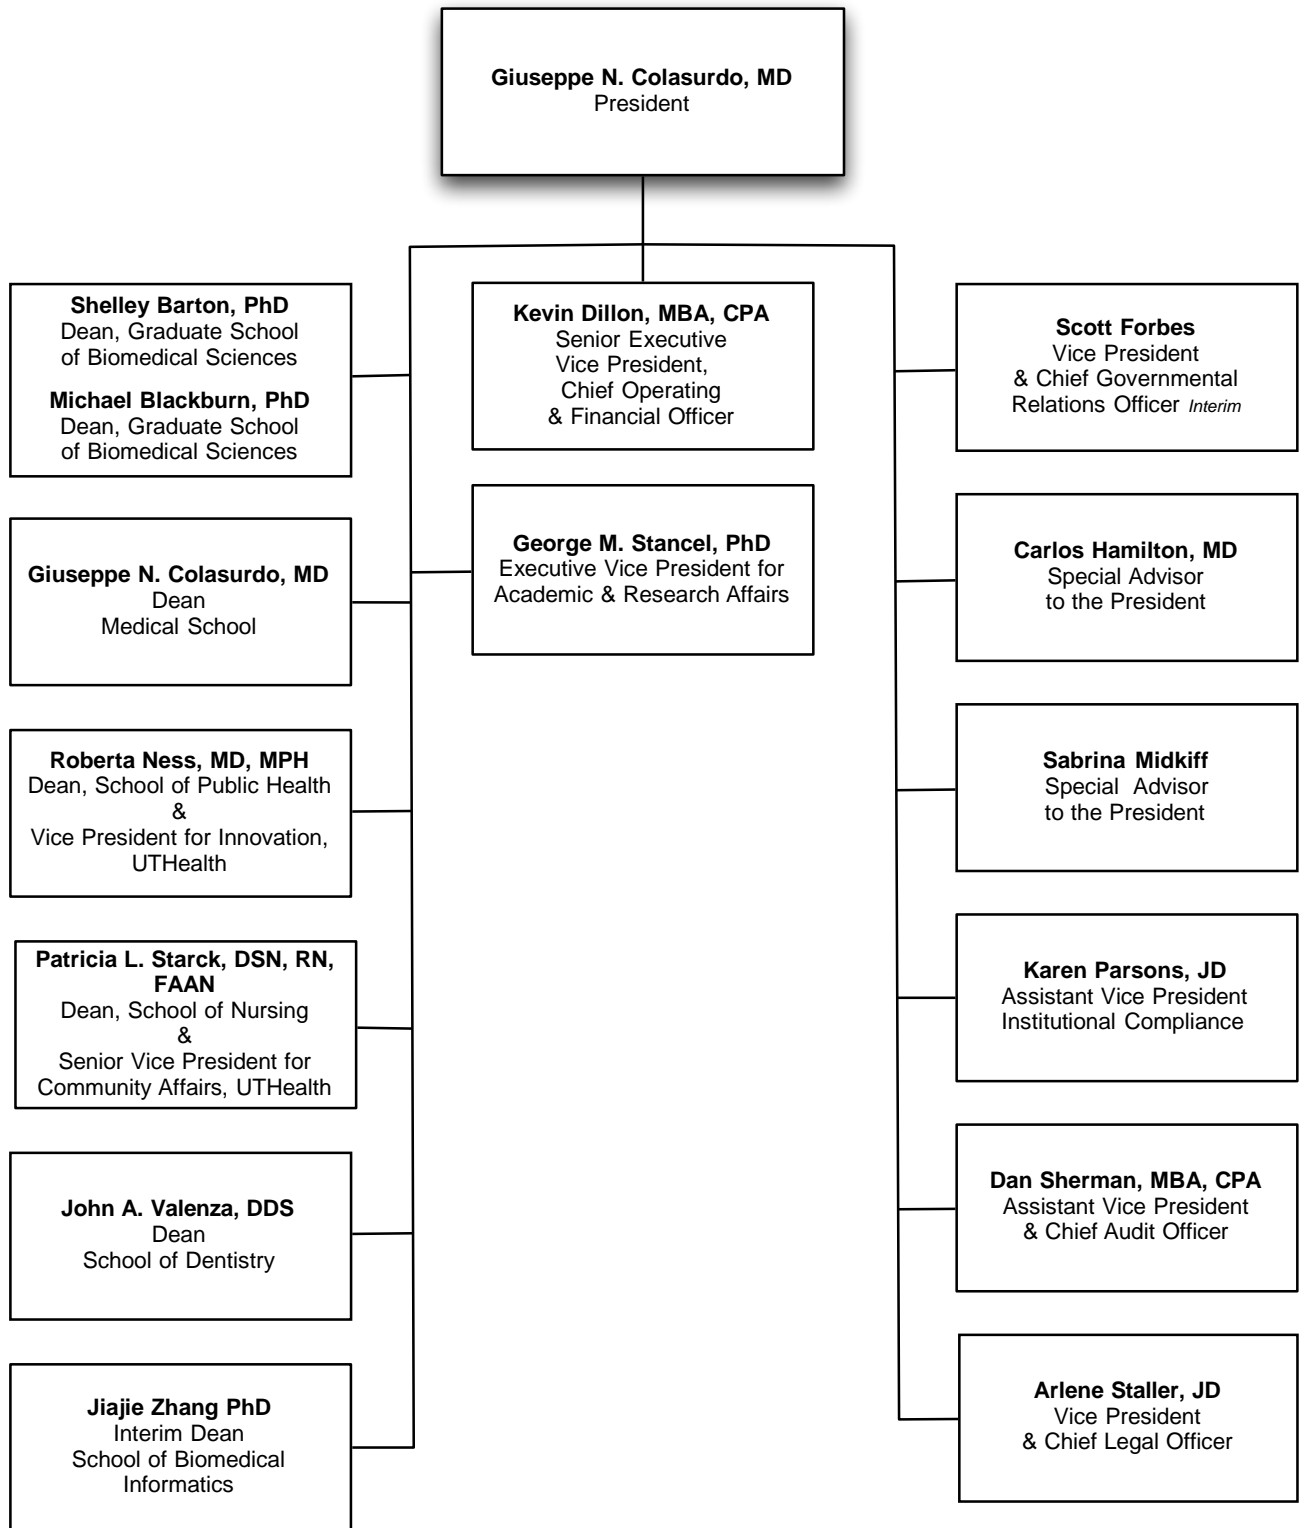

Wallace L. Hall, Jr.

Brenda Pejovich

Each Regent's term expires when a successor has been appointed, qualified, and taken the oath of office. The Student Regent serves a one-year term.

## School of Biomedical Informatics *Profile*

---

source: [Jiajie Zhang, PhD](#), and [Hongbin Wang, PhD](#), School of Biomedical Informatics

### History and Purpose

The School of Biomedical Informatics (SBMI) is the first national program at a school level devoted exclusively to graduate education in health informatics. Informatics first became the focus of SBMI in 1997. The school's name was changed to the School of Health Information Sciences in 2001, and it was rebranded in 2010 to more accurately reflect its new mission. SBMI is now recognized locally, nationally, and internationally for its independent, interdisciplinary approaches to research, education, and entrepreneurship in informatics. The school's mission is to provide educational and research opportunities in informatics to health care professionals, biomedical scientists, and information technology professionals working as interdisciplinary teams. Biomedical research and healthcare solutions are advanced by bringing together the computer, engineering, cognitive and medical sciences. SBMI's interdisciplinary programs mean that breakthroughs in the lab will be translated more efficiently into quality care; researchers will have better tools to advance treatments and cures, physicians will have better diagnostic tools and ways to obtain necessary information, and patients will have better access to personalized care.

### Instructional Programs

Health and Biomedical Informatics is the interdisciplinary scientific field that studies and pursues the effective uses of biomedical data, information, and knowledge for scientific inquiry, problem solving and decision making, motivated by efforts to improve human health ([amia.org](#)). SBMI offers interdisciplinary graduate-level courses in health and biomedical informatics for students enrolled in UTHealth schools and for health professionals and scientists in the Texas Medical Center (TMC), across the nation, and throughout the world. The curriculum stresses the development of interdisciplinary teams to evaluate and address the complex informatics issues that confront healthcare and biomedical research in the next century. Students enter SBMI's Health Informatics programs with a strong scientific foundation derived from their previous undergraduate or graduate studies, and will study how to communicate knowledge across traditional, professional, and organizational barriers. As they progress, students will acquire knowledge needed to organize, store, display, communicate, and evaluate that knowledge across a variety of systems: electronic, social, and political.

Currently, SBMI offers two degree programs: a master of science in Health Informatics (MS) and a doctor of philosophy in Health Informatics (PhD). The school also offers a dual-degree program in Public Health Informatics with the School of Public Health, leading to an MPH/MS or an MPH/PhD. Three five-course certificate programs in Health Informatics, Applied Health Informatics, and Public Health Informatics are also available. The master's and certificate programs can be completed online.

Students come to SBMI with a variety of skills and diverse backgrounds. Each student, along with a faculty advising committee, determines his/her program of study from a matrix of courses and one or more focus areas, including clinical & cognitive informatics, translational informatics, applied informatics, and public health informatics. SBMI programs receive strong support from other UTHealth schools, Texas Medical Center (TMC) organizations, and numerous collaborating institutions. Scientists and practitioners across UTHealth, the TMC, and beyond are continuously working with SBMI to create a real world laboratory for honing knowledge and refining research skills.

#### First Focus Area: Clinical & Cognitive Informatics

Cognitive science in medicine  
Artificial intelligence, knowledge modeling, and medical decision support  
Information retrieval, data mining, and database design  
Ontology  
Practice guidelines and standards  
Electronic medical records  
Telemedicine  
User interface design and human-computer interaction in health care  
Information display and visualization  
Patient safety  
Natural language processing and machine learning  
Personal health information management

#### Second Focus Area: Translational Informatics

Clinical translational science  
Bioinformatics and genomics  
Integrated data warehousing  
Big data analytics  
Computational biostatistics  
Neuroinformatics

#### Third Focus Area: Applied Informatics

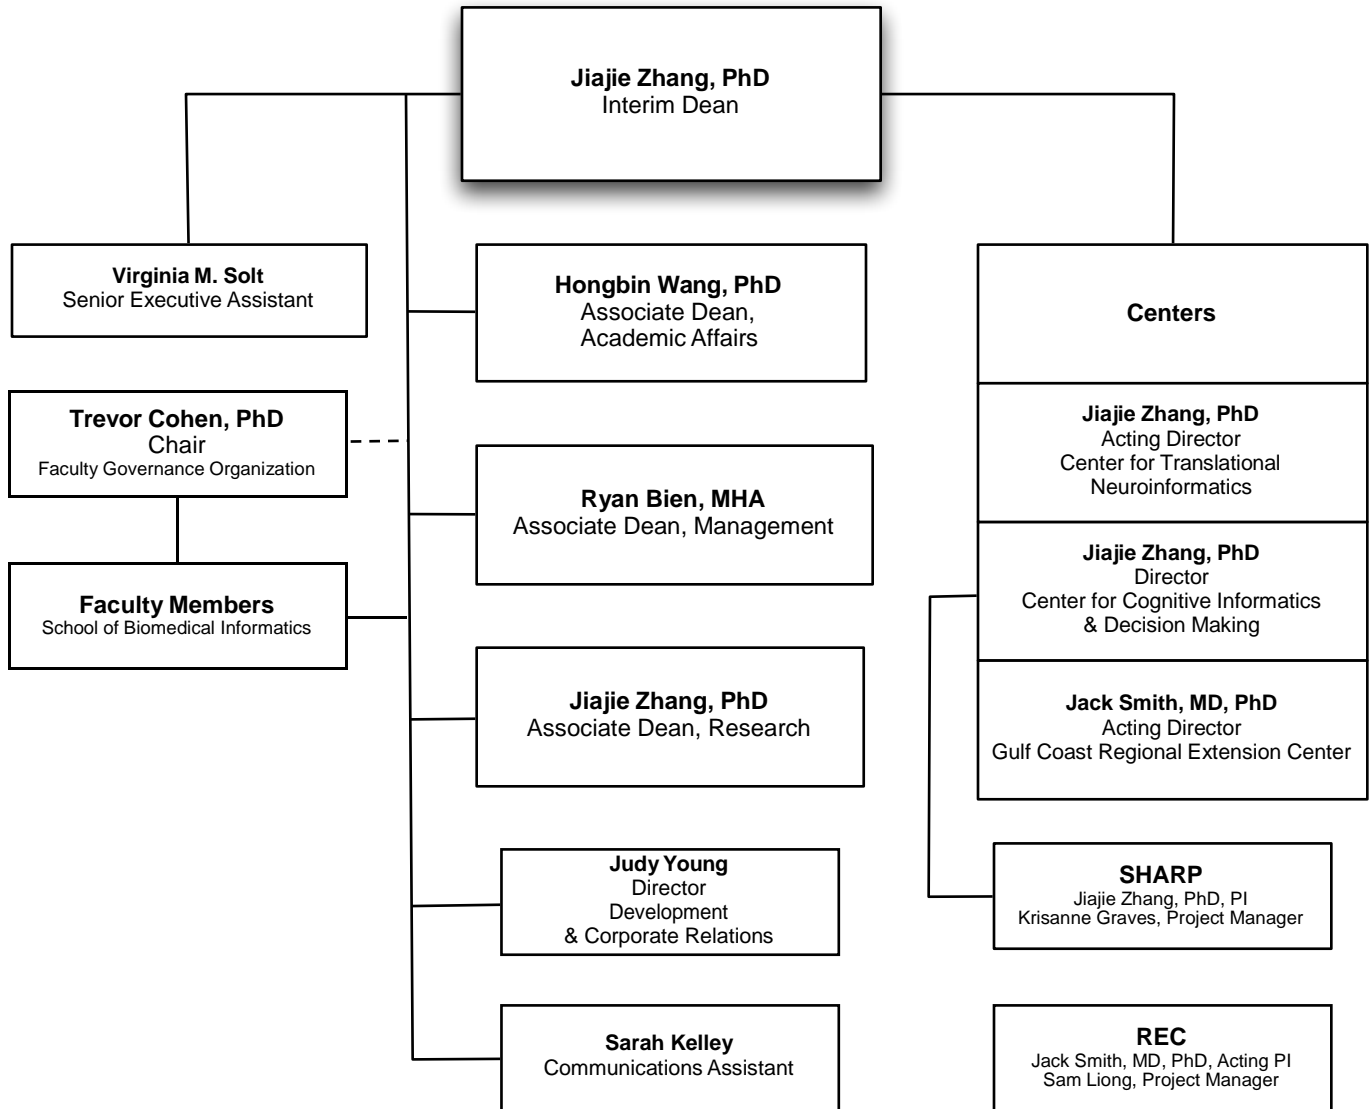

Data analytics for quality, safety, and cost in healthcare  
Workflow optimization  
Data warehousing  
Clinical decision support for clinical operations  
Data quality

#### Fourth Focus Area: Public Health Informatics

Public health informatics & biosurveillance  
Healthcare management informatics  
Big data analytics

# School of Biomedical Informatics Organization

## School of Dentistry Profile

---

source: Art Jeske, DMD, PhD, School of Dentistry

### History and Purpose

For more than 100 years, The University of Texas School of Dentistry (UTSD) at Houston has set the standard for oral health excellence by educating outstanding dentists and dental hygienists, discovering new oral health advancements and caring for the people of Texas. Founded in 1905 as the privately owned Texas Dental College, UTSD was the first dental school in Texas and the first professional school in Houston. The school became part of UT System in 1943 as The University of Texas School of Dentistry and in 1955 was renamed "The University of Texas Dental Branch," a name it held until June 1, 2011, when it again became the UT School of Dentistry. In 1945, the UT System Board of Regents authorized creation of the Dental Hygiene Program as part of UTSD. The first dental hygiene class was admitted in 1955. The School of Dentistry is part of The University of Texas Health Science Center at Houston (UTHealth).

### Fulfilling the Mission: Education

The School of Dentistry offers 10 accredited programs: DDS, dental hygiene, two primary care general residency programs and specialty programs in endodontics, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics, and prosthodontics. The school also offers a DDS/PhD in collaboration with the UT Graduate School of Biomedical Sciences, and an MD degree through the UT Medical School with an oral and maxillofacial surgery certificate. The School of Dentistry has integrated a focus on cultural competency, diversity and inclusion into all four years of the undergraduate dental curriculum, built on the foundation of the American Medical Student Association's Achieving Diversity in Dentistry and Medicine guidelines. One example of this commitment to diversity is serving as a site for The Robert Wood Johnson Foundation's Summer Medical and Dental Education Program. This intensive, personalized preparatory program for pre-dental and pre-medical students has the ultimate goal of increasing the number of under-represented and minority health care practitioners in Texas.

### Fulfilling the Mission: Research

Researchers at the School of Dentistry work in diverse areas to develop new knowledge applicable to the prevention, diagnosis and treatment of oral and systemic diseases. Current areas of investigation are:

- genetic studies of orofacial clefts and tooth agenesis;
- salivary biomarker profiles for diagnosing local and systemic disease;
- regenerating craniofacial structures through tissue engineering and advanced imaging;
- mechanisms of mucosal immunity and autoimmunity;
- biomaterial and biomimetics research;
- molecular imaging of oral and other types of cancer;
- applying information sciences to oral health and disease; and
- advanced imaging of craniofacial structures

UTSD is also preparing the next generation of scientists. Dental students participate in research projects, and UTSD research programs support the master's level research of dental students receiving advanced education in endodontics, orthodontics, pediatric dentistry, periodontics, and prosthodontics.

### Fulfilling the Mission: Patient Care/Community Service

UTSD's patient care programs are broad and diverse, as the school operates a faculty practice, as well as advanced education and predoctoral (DDS, DH) clinics. UT\*Dentists, the school's faculty practice, has a main practice site at the school, as well as an oral and maxillofacial surgery clinic in nearby Smith Tower, and a surgical oral pathology service. UT\*Dentists includes practitioners in general practice, dental hygiene, endodontics, imaging, oral pathology, oral surgery, orthodontics, pediatric dentistry, periodontics and prosthodontics.

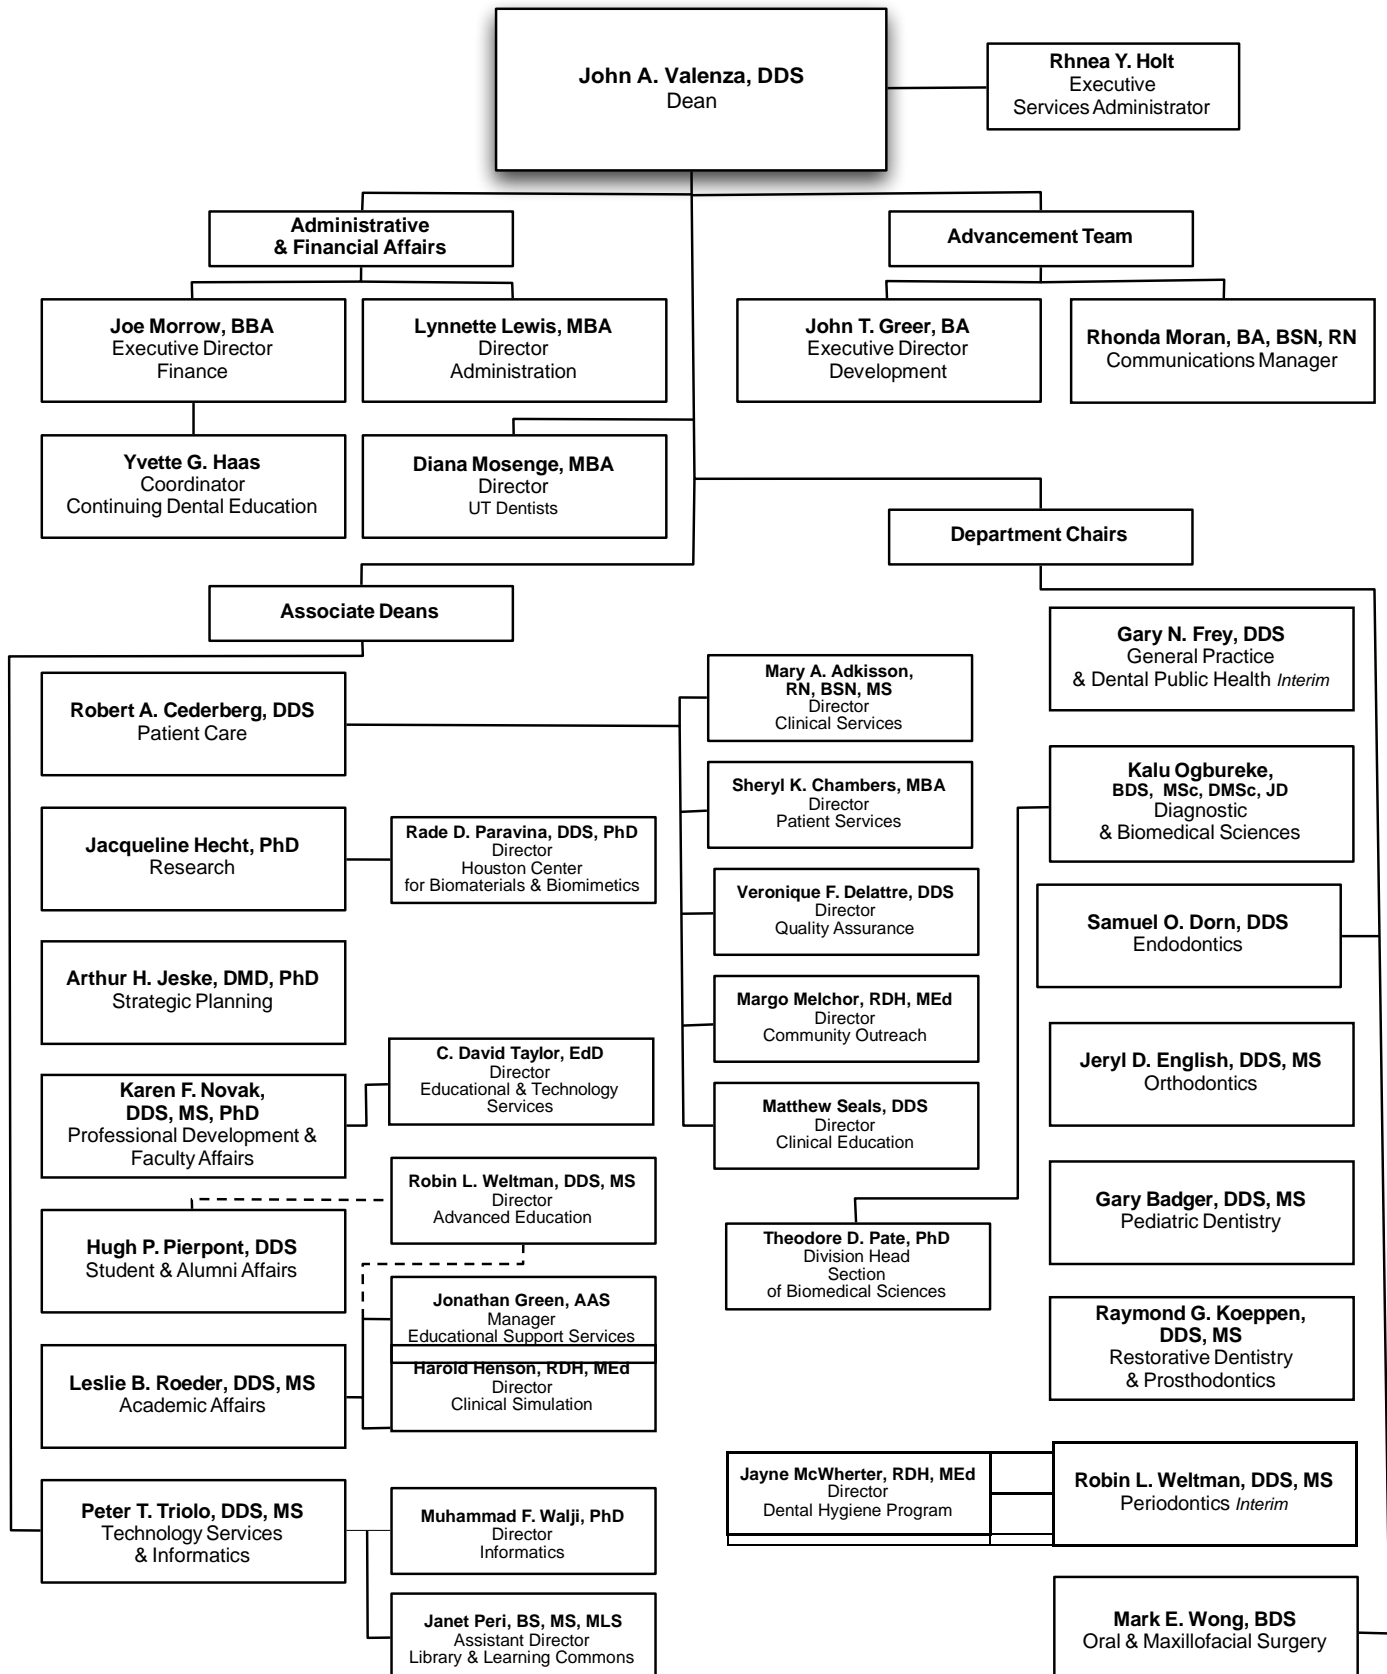

Students are exposed to a wide variety of clinical procedures during their training at UTSD, both in the onsite clinics and during rotations in the community. The school has affiliations with nine hospitals, 48 HISD schools and more than 30 clinics, community agencies and long-term health care centers. As the only dental school in southeast Texas, UTSD is a primary source of quality oral health care for low-income families, the traditionally underserved, and for patients with special needs and/or medical co-morbidities. The patient-care program exposes students to the latest dental technologies such as digital imaging, digital impressions, electronic patient records and laser dentistry. Students actively participate in the delivery of dentistry to various population groups and also provide care in unique clinical settings, such as the new UTHealth/Ronald McDonald House Care Mobile. Patient-care experiences for students are quite robust, and with an ever-increasing emphasis on community service learning, UTSD students receive a well-rounded education enhanced by extensive clinical experience.

### Facilities

In mid-2012, the School of Dentistry moved to a new, 300,000 square-foot building in UT Research Park on the south campus of the Texas Medical Center. That same \$155 million project also saw completion of the Denton A. Cooley, MD, and Ralph C. Cooley, DDS, University Life Center -- a 14,000 square-foot conference center attached to the new dental school its north side. On the west, the school is attached to the new UT Behavioral and Biomedical Sciences Building, where UTSD researchers are at work. The new dental school features lecture rooms, a library and learning commons, a simulation clinic, a surgical oral pathology laboratory, a faculty practice clinic, faculty and administrative offices, clinics, and service and mechanical areas, as well as a landscaped courtyard suitable for outdoor functions. The school is a leading provider of dental continuing education. In addition to public funds, philanthropic gifts helped to complete and equip the new building and provide funds for endowments, scholarships, research and community outreach.

## Graduate School of Biomedical Sciences *Profile*

---

source: [Linda Carter](#), Graduate School of Biomedical Sciences

### History and Future

Two new Deans, Michelle Barton, PhD, and Michael Blackburn, PhD, were both named leaders of The University of Texas Graduate School of Biomedical Sciences (GSBS) on July 1, 2012. Their vision is to maintain an innovative and diverse environment that provides an unprecedented breadth of opportunity for top graduate students to train with faculty who are outstanding biomedical scientists at The University of Texas Health Science Center at Houston (UTHealth) and The University of Texas MD Anderson Cancer Center (MD Anderson).

Dedicated to the highest level of education, GSBS faculty, classrooms, and laboratories are drawn from these two major institutions (UTHealth) and (MD Anderson) and provide a unique, interdisciplinary collaborative model of graduate education. Authorized by the 58<sup>th</sup> Legislature in 1963, GSBS today educates the future PhD and MS biomedical scientists and combined MD/PhD graduates for both University of Texas components. The mission of GSBS is to educate research scientists and scientist-educators, to generate new knowledge in the biomedical sciences that is translated into improved health, and to increase public understanding of science. As a public institution its charge is to train the scientists of tomorrow to meet the workforce needs of the state and nation.

### Instructional Programs

The School offers PhD and MS degrees and a joint MD/PhD physician-scientist program and is fully accredited by the Southern Association of Colleges and Schools. Over 520 students are working toward degrees with approximately 70 students graduating annually. The student body includes approximately 36 percent of its population from Texas, 26 percent from the United States (not including TX), and 38% who are international students; 56 percent women and 44 percent men. Annually GSBS provides in excess of \$1 million in scholarship, fellowship and stipend support annually for scholastic excellence and research achievement.

2012 Fall faculty included 522 full time members plus additional adjunct faculty. This large and distinguished group encompasses two members of the National Academy of Science, four Pew Scholars, a Fulbright Lifetime Achievement member and numerous recipients of other honors, awards and professional recognition.

Faculty of our participating institutions consistently receive nearly \$300 million in research support annually from the National Institutes of Health and the National Science Foundation, which ranks in the top 5 percent of NIH funding in the world. In addition, of our clinical partners, Memorial Hermann was the first hospital founded in the Texas Medical Center and is one of only two certified Level I Trauma Centers in the greater Houston area, and *US News & World Report* ranked MD Anderson the #1 Cancer Hospital in the United States.

Known for its educational philosophy of excellence through flexibility and personal attention, GSBS gives students the opportunity to join an established program to suit their professional goals. Nationally ranked programs include biochemistry and molecular biology, biomathematics and biostatistics, cancer biology, cell and regulatory biology, experimental therapeutics, genes and development, genetic counseling, human and molecular genetics, immunology, medical physics, microbiology and molecular genetics, molecular carcinogenesis, and neuroscience.

### Facilities

The Graduate School, including the Dean's Office and Administrative personnel, is located in the George and Cynthia Mitchell Basic Sciences Research Building where it is housed in the June & Virgil Waggoner Academic Hall. Complete with state of the art classrooms, computer lab, auditorium, and telecom capabilities for beaming classes and lectures around the globe, it is geared for a growing and dynamic student population.

The research facilities and related resources available to GSBS students are unmatched anywhere in the world. The collaborative nature of the graduate school, with world-class faculty from UTHealth, MD Anderson Cancer Center and Texas A&M Institute for Biosciences & Technology, is expanded throughout the Texas Medical Center – the largest medical center in the world with 21 academic institutions and 14 hospitals. The graduate school has developed academic arrangements (including shared research and classroom facilities) with other institutions both individually, and through the Gulf Coast Consortium (GCC) that includes the region's most prominent academic institutions – MD Anderson, UTHealth, University of Texas Medical Branch, Rice University, Baylor College of Medicine and the University of Houston.

GSBS students and their faculty mentors have access to more than 60 core laboratory facilities and specialized instrumentation through these and other collaborative agreements. During the past decade, more than 2 million square feet of research space has been added to UTHealth and MD Anderson, including the continued, joint development of the University of Texas Research Park, designed to foster major collaborative efforts and link academic and commercial research as partners in molecular imaging, drug discovery and development, diagnostics, and other translational research opportunities. This expansion includes several new centers and institutes that provide students with additional collaborative research environments across traditional departmental and programmatic boundaries.

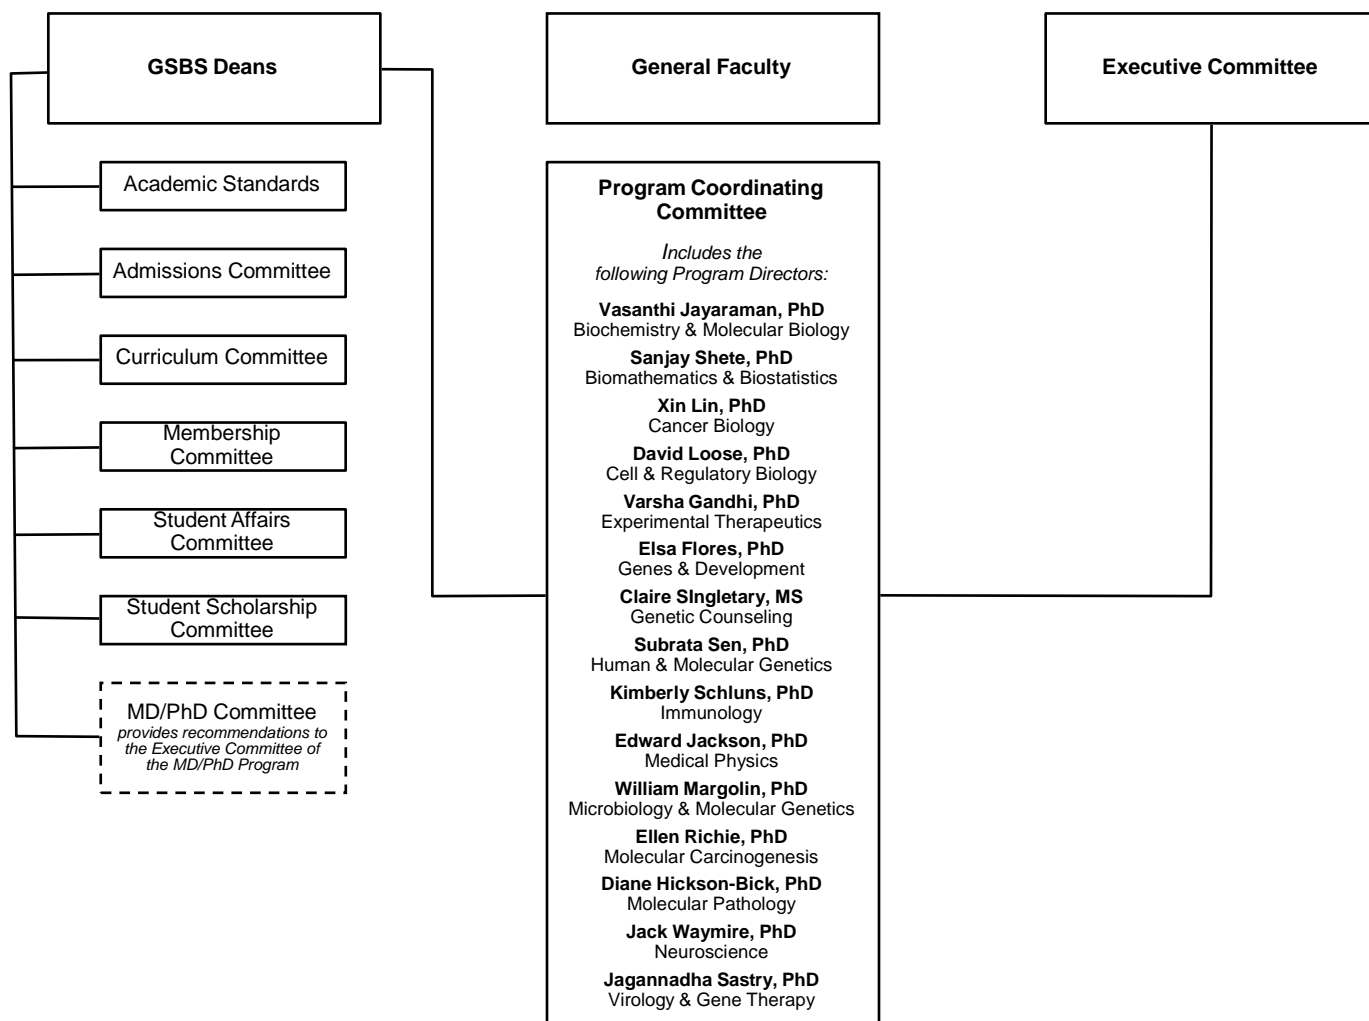

# Graduate School of Biomedical Sciences Organization

source: [Eric Solberg](#), Graduate School of Biomedical Sciences

## GSBS Deans' Office

## GSBS Governance

## Medical School Profile

source: [Darla Brown](#), Medical School

### History and Purpose

On June 13, 1969, The University of Texas Medical School at Houston was created by an act of the Legislature and an appropriation for its initial cost was made to be effective September 1, 1969. The mission of the Medical School is to provide the highest quality education and training of future physicians for the state of Texas, in harmony with the state's diverse population; to conduct the highest caliber of research in the biomedical and health sciences; and to provide exemplary clinical services.

### Instructional Programs/Joint Programs

#### Doctor of Medicine

The Medical School program leading to a medical doctor degree has two primary components: two years of basic science study and two years of clinical experience. The basic science years, with the second year designed as a bridging year, are devoted to preparing the student for the clerkship experiences of the third and fourth years. Each student has a faculty adviser who helps devise the student's educational sequence and set career goals and postgraduate educational plans. An alternate pathway program, entered during the first year, allows a student to complete the first year of basic science courses in two years.

#### Doctor of Medicine/Doctor of Philosophy

The Medical School and the Graduate School of Biomedical Sciences participate in a combined program leading to the MD and PhD degrees. This program is sponsored and supported by both UTHealth and UT M D Anderson Cancer Center, is administered by an MD/PhD committee, and involves faculty from both institutions. The requirements for the program meet the general requirements of both degrees in a flexible six-year program.

#### Doctor of Medicine/Master of Public Health

The Medical School and the School of Public Health participate in a combined program leading to the MD and the MPH degrees. The program is integrated throughout a five-year period with a typical program participant spending a year working exclusively on the MPH with the possibility of concurrent enrollment for the completion of some requirements. The requirements established for the program meet the general requirements for both degrees.

#### Doctor of Medicine/ Oral and Maxillofacial Surgery Residency (MD/OMS)

Both a 4-year and 6-year Advanced Education Program in Oral and Maxillofacial Surgery is offered through the Medical School. Each program prepares practitioners to treat diseases, injuries, and defects involving both the functional and aesthetic aspects of the hard and soft tissues of the oral and maxillofacial region. The basic prerequisites for both 4 and 6-year programs are a DDS or DMD degree from an accredited dental school and National Dental Boards Parts I & II.

#### Master of Science in Clinical Research

In August 2002, the Medical School began offering a master's degree in clinical research. This degree program is designed as a focused, flexible, and affordable program to train clinical investigators in designing and conducting patient-oriented research that is of exemplary quality. The curriculum accommodates clinicians' busy schedules; classes meet one afternoon a week. The degree can be completed in two to four years depending on the amount of time a student devotes to the program. Students may choose one of two tracks – a patient-based clinical research track or a translational research track.

#### Reciprocal Agreements

Through reciprocal agreements, students at other UT System components, Rice University, Baylor College of Medicine, Texas Women's University, and the University of Houston may take graduate courses for credit at UTHealth. In addition, UTHealth graduate students may take courses for credit at any of the above institutions. Mechanisms for payment of tuition or registration fees vary according to the individual institution.

### Facilities

The nine-story Medical School Building is connected on the south end to a six-story research building, the Medical School Expansion (MSE), which replaced the original John Freeman Building. On its north side, the building bridges Ross Sterling Avenue to form one continuous structure with Memorial Hermann Hospital - Texas Medical Center. The Medical School Building contains offices, laboratories, classrooms, lecture halls, study areas, educational and biomedical communications support areas, student lounges, and administrative suites. The Medical School leases space in the nearby Jesse Jones Library Building for administrative functions, departmental functions, and clinical research. The top two floors of the MSE are devoted to a state-of-the-art vivarium, and the first four floors are dedicated to research. The Department of NanoMedicine and BioMedical Engineering and the Department of Internal Medicine's Division of Cardiovascular Medicine are located at South Campus Research Building 3. The Department of Psychiatry and Behavioral Sciences also is located on the South Campus at the Behavioral and Biomedical Sciences Building. The Brown Foundation Institute of Molecular Medicine for the Prevention of Human Diseases is located in the Faye S. Sarofim Research Building. Physician faculty provide the majority of their outpatient care in the UT Professional Building, which is located across the street from the Medical School and at a growing number of UT Physicians clinics around the Greater Houston area.

### Affiliated Hospitals

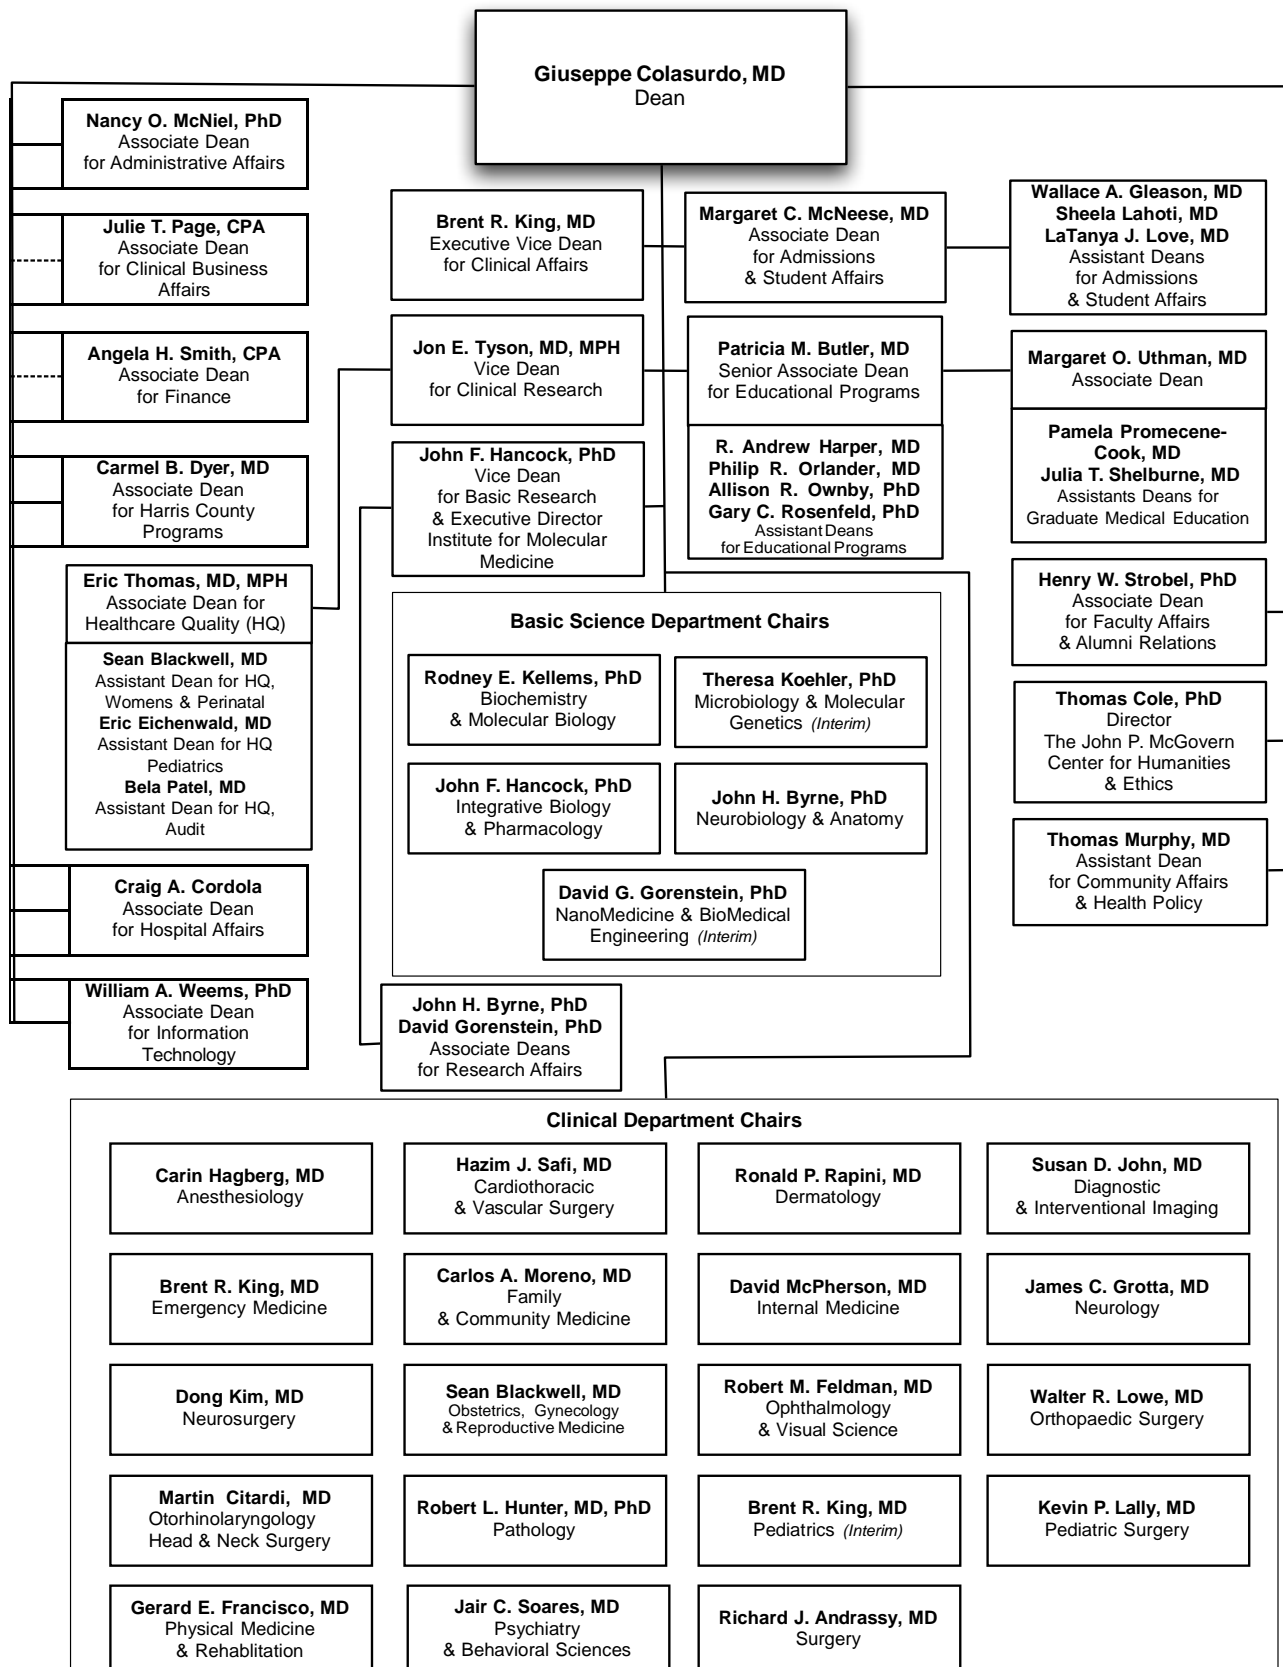

Primary affiliations are with Memorial Hermann Hospital – Texas Medical Center and the Lyndon B. Johnson General Hospital of the Harris Health System. Other major affiliates include UT M D Anderson Cancer Center, UT Harris County Psychiatric Center, and the Texas Heart Institute/St. Luke's Episcopal Hospital.

### Group Practice

Please see *Patient Care* section for Faculty Practice Plan (MSRDP), UT Physicians, and Affiliated Medical Services.

# Medical School Organization

source: [Darla Brown](#), Medical School

## School of Nursing *Profile*

---

source: [David Bates](#), School of Nursing

### History and Purpose

The University of Texas Health Science Center at Houston School of Nursing, established in 1890 as part of the John Sealy Hospital Training School for Nurses in Galveston, is one of the oldest schools of nursing in the southwestern United States. The baccalaureate nursing program of the UT System expanded to Houston in 1972, the same year that UTHealth came into being. The UT School of Nursing was organized in 1972 and began offering the master of nursing degree in the same year. In 1976, the system structure dissolved and the School of Nursing was reorganized under the control of the health science center. The School initiated the Doctor of Science in Nursing degree program in 1995 and the Doctor of Nursing Practice degree program in 2006.

### Instructional Programs

#### Bachelor of Science in Nursing

The School of Nursing offers an undergraduate program leading to the degree of bachelor of science in nursing (BSN). The undergraduate program is designed for students who wish to enter the profession of nursing and for nurses who have earned an associate degree or diploma in nursing and desire to obtain the baccalaureate degree. The three-semester RN-BSN program requires a summer or spring semester start. The school offers an accelerated BSN (15 months) for summer-semester starts. In summer 2010, the School began offering the "Pacesetter" option in the four-semester Accelerated BSN curriculum. During their final semester, Pacesetters have full-time clinical rotations over 16 weeks to truly "live the life of a nurse." The more intense clinical experience in the Pacesetter option is intended to produce a more "job-ready" BSN graduate. A new dual-degree program will allow freshmen entering the University of Houston to earn credit hours toward both a bachelor's degree from UH and a BSN from the UT School of Nursing, so that program participants should be able to complete both degrees within five years.

#### Master of Science in Nursing

The master's program (MSN) is designed for nurses who have the baccalaureate degree in nursing and wish to prepare for advanced practice in a specialized area with role preparation as clinical specialists, educators, administrators, or nurse practitioners.

Six program options are available in the MSN degree program:

- Acute Care Nursing
- Adult/Gerontology
- Family Nurse Practitioner
- Nurse Anesthesia
- Nursing Leadership and Administration in Health Systems
- Nursing Education

#### MSN/MPH

A cooperative degree option of MSN/MPH is offered jointly by the School of Nursing and School of Public Health. Post-master's certification courses are also available.

#### Doctor of Philosophy in Nursing

In 1995, the school was approved to implement a doctor of science in nursing (DSN) degree program. This research doctoral degree title was changed to the Doctor of Philosophy (PhD) degree in September 2007 for past, present and future graduates.

#### Doctor of Nursing Practice (DNP) Program

The UT School of Nursing at Houston was the first in Texas to offer a Doctor of Nursing Practice (DNP) degree and graduated the first DNP class in the state in May 2009. The DNP degree program is a cutting-edge *practice doctorate* that prepares advanced practice nurses with depth and breadth of knowledge and competencies to be clinical scholars recognized for outstanding direct patient care and leadership in nursing practice and health care organizations. Students develop high-level expertise in evidence-based practice and translation of evidence to individuals and populations using the latest knowledge, technology, and informatics to support new models of care delivery and quality patient outcomes. This post-master's degree program admits nurse practitioners, clinical nurse specialists and nurse anesthetists. Both part-time and full-time options are available. Although most students are admitted once a year in the fall, applications are processed throughout the year. The curriculum includes 32-43 credit hours and is designed to meet the educational needs of busy, working advanced practice nurses.

### Facilities and Affiliations

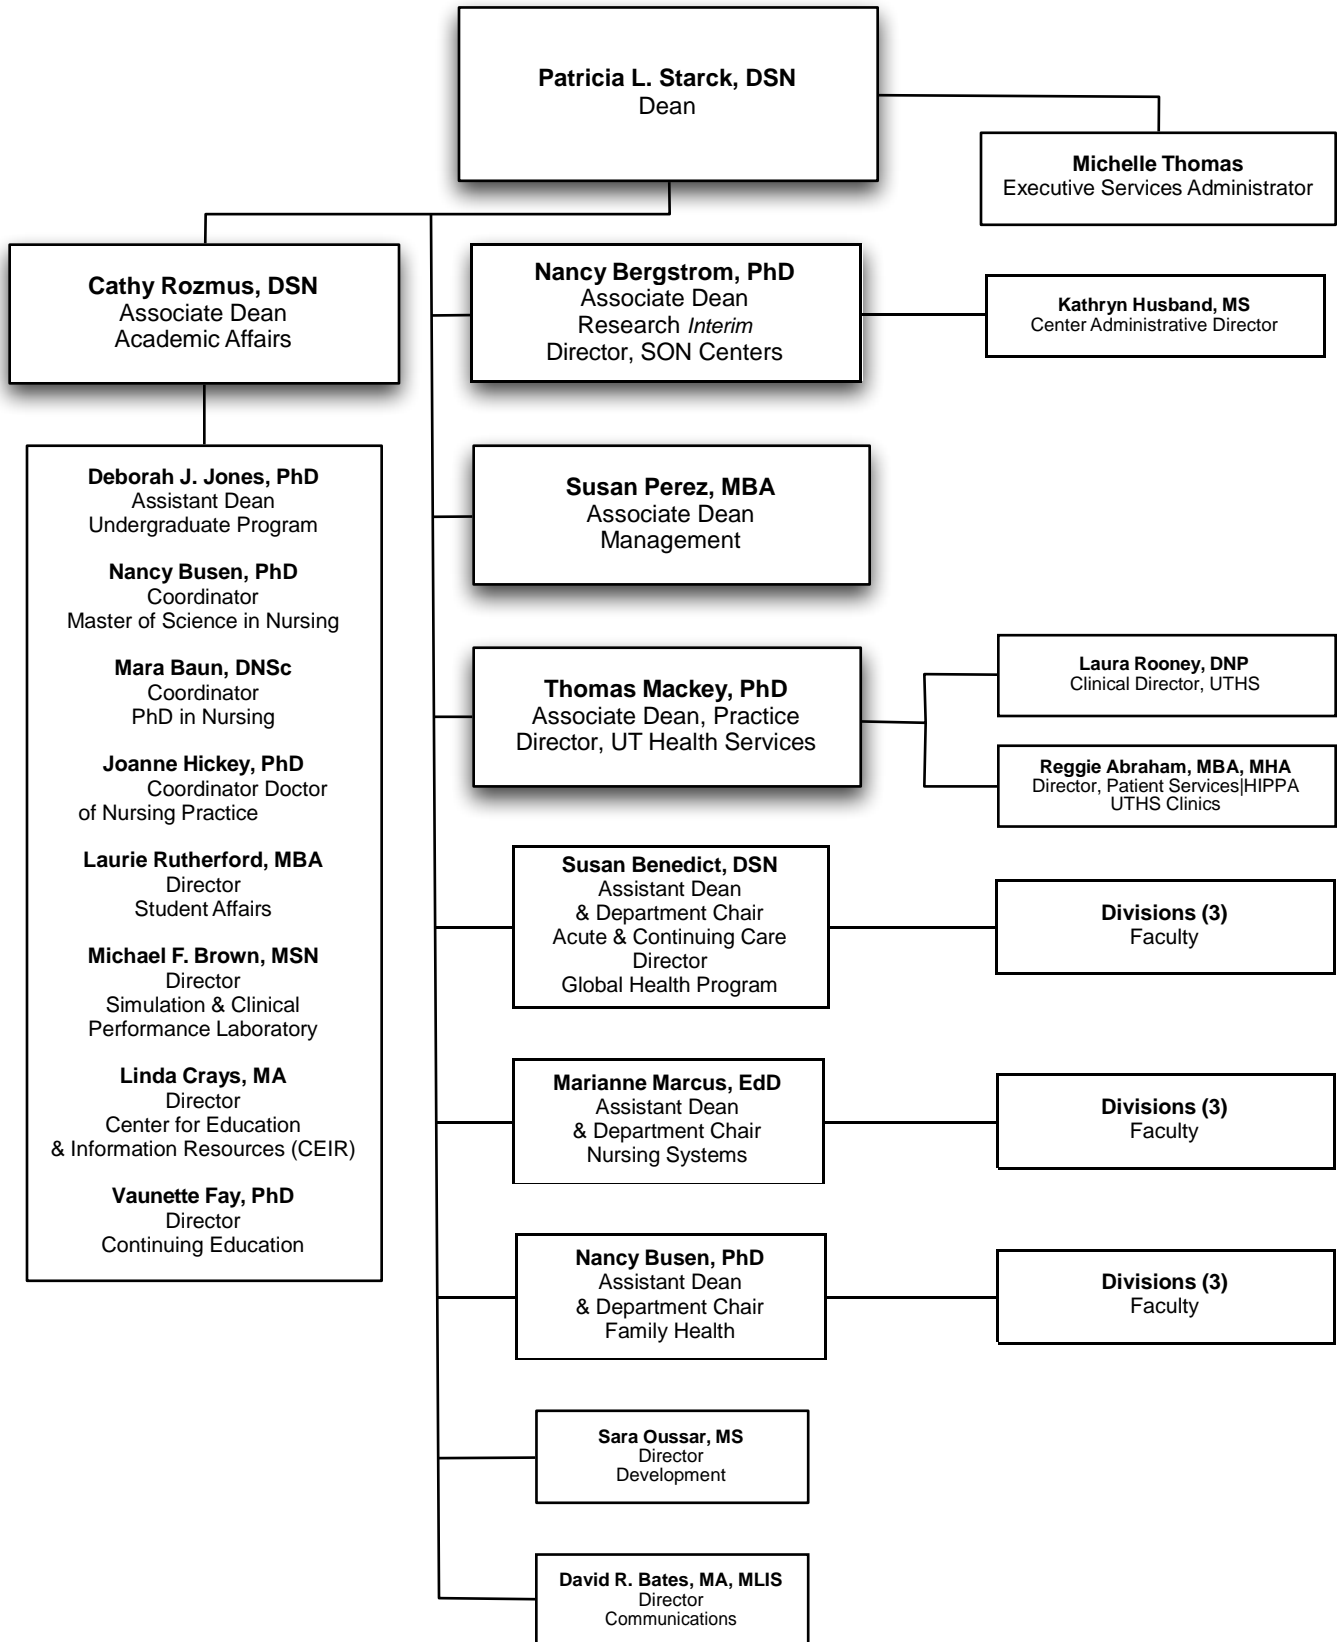

Clinical learning experience is available within other UT components in the Texas Medical Center and in the broader community. Affiliate institutions include: the Memorial Hermann Healthcare System, St. Luke's Episcopal Hospital, Texas Children's Hospital, St. Joseph Hospital, TIRR Memorial Hermann, UT Harris County Psychiatric Center and other healthcare facilities. Students also have opportunities for learning experiences in neighborhood health centers, nursing homes, day care centers, city and county health departments, mental health facilities and physicians' offices and clinics.

A unique opportunity for clinical training is offered by UT Health Services (UTHS), established in 1991.

UT Health Services is located at 7000 Fannin, 16th floor. This clinic provides comprehensive primary care across the life span, occupational medicine, health education, travel medicine and laboratory services to individuals within the university and to the larger community. The providers are nurse practitioners, and a physician periodically is available in clinic to meet any additional medical needs. Contact 713-500-3267 or go to [www.UTHealthservices.com](http://www.UTHealthservices.com) for more information.

# School of Nursing Organization

## School of Public Health Profile

---

source: [Shon Bower](#), School of Public Health

The University of Texas School of Public Health (UTSPH) has been making health happen by protecting and transforming the health of people in Texas, across the nation and around the world since 1967. With six campuses throughout the state, the school has established a strong reputation as a leader in public health. In addition to being nationally ranked, UTSPH is the #1 ranked program in health promotion and prevention and is a premier program for students interested in genetics, epidemiology and disease prevention.

The School has four divisions of study: Biostatistics; Epidemiology, Human Genetics and Environmental Sciences; Management, Policy and Community Health; and Health Promotion and Behavioral Sciences. There are also thirteen research centers within the school focusing on specialized research needs in the diverse areas of public health.

### History

Authorized in 1947, the Texas State Legislature appropriated funds for the UT School of Public Health in 1967. The first student was admitted in 1969. Enrollment grew by leaps and bounds during the first 10 years, a testimony to the previously unfulfilled need for public health professionals.

By the end of 2011, more than 6,000 students graduated from the school. Approximately 50% of the school's graduates work in Texas with the remainder addressing public health issues in the US and around the world.

### Locations

The main campus of the school is located in Houston at the world renowned Texas Medical Center. The main structure, the Reuel A. Stallones building, was named for the school's first dean. The 10-story, 220,000 gross-square-foot building is located in a park setting with outstanding library, classroom, computer and research laboratory facilities. The UT School of Public Health is one of the only schools of public health to have a dedicated public health library on site. The school's location in the Texas Medical Center allows students and faculty to collaborate in research and service with many outstanding health related institutions in the world's largest medical center, as well as in the local community.

To address the need for graduate level public health education across the state of Texas, Regional Campuses were established in San Antonio (1979), El Paso (1992), Dallas (1998), Brownsville (2001), and Austin (2007).

### Degree Programs

The University of Texas School of Public Health offers four degree programs leading to the skills necessary for public health careers. Professional degrees can be used for practicing public health outside of higher education – the Master of Public Health (MPH) and the Doctor of Public Health (DrPH). Academic degrees are primarily used for teaching and research – the Master of Science in Public Health (MS) and the Doctor of Philosophy in Public Health (PhD).

Students learn to conduct research on important public health concerns at the UT School of Public Health while working with faculty teams who uncover answers to urgent public health issues.

#### MPH - Master of Public Health

The Master of Public Health (MPH) degree is the basic professional degree in the field. It is required for many supervisory and managerial positions in public health and is recommended for many others. Students are admitted to one of the Divisions or Regional Campuses through which they complete a series of courses that cover the breadth of public health and develop competencies appropriate for their elected discipline. Many courses and educational activities are available to qualified students across all disciplines.

The majority of full-time students take approximately 18 to 24 months to complete the degree. Requirements of the MPH degree are: completion of coursework; a planned, supervised, and evaluated practice experience (Practicum); and a culminating experience demonstrating a substantial knowledge of public health.

#### DrPH - Doctor of Public Health

The Doctor of Public Health (DrPH) degree signifies distinguished scholarly accomplishment in the professional field. It is primarily designed for those who plan careers involving professional practice, teaching or research. Students will be affiliated with one of the four Divisions; however, courses may be taken in any Division.

DrPH programs are available at regional campuses as well as at the main campus in Houston.

In order to complete a DrPH degree, students are required to complete one major and minor area of study in one of the five public health disciplines and one public health breadth area. For completion of the degree, students must complete all required coursework, a practicum experience, a qualifying exam and a dissertation.

#### MS - Master of Science

The Master of Science (MS) degree signifies academic accomplishment in a public health discipline and is offered to those who plan careers in teaching and research. The M.S. student is expected to focus in one field of study while gaining an understanding of the interrelations within the public health disciplines.

Students are encouraged to draw upon the resources of the school but may also work with faculty at other institutions of higher learning. The academic plan will be guided by the faculty advisor, the student, and the Advisory Committee to meet the student's specific educational goals. A student elects one field as a major and selects another public health discipline as a minor area of study. The majority of full-time M.S. students take at least two years to complete all degree requirements – coursework and a thesis.

### **PhD - Doctor of Philosophy**

The Doctor of Philosophy (PhD) degree in Public Health represents outstanding scholarly attainment and signifies a capacity for independent study. It is primarily a research and teaching degree.

PhD students select one major and one minor area in addition to one public health breadth area to study. PhD candidates must complete coursework, a qualifying exam, and an original research dissertation.

### **Concentrations**

Any student in a degree program can choose to focus their studies in one of several available concentrations. A concentration is defined as a problem-based area that spans disciplinary fields and therefore draws upon faculty expertise from two or more divisions.

Concentrations are supported by a specific curriculum and consist of 9-14 credit hours of coursework. The concentration will be noted on transcripts but not on a final diploma.

Concentrations are open to students at all campuses. The areas of concentrations available to students are: Global Health; Health Disparities; Leadership; Maternal and Child Health; and Physical Activity and Health.

### **Dual Degree Programs**

The University of Texas School of Public Health collaborates with many universities to provide our students every opportunity to expand their knowledge base and achieve advanced degrees. The following dual degree programs are currently being offered.

- JD/MPH - University of Houston Bates Law School
- MD/MPH - The University of Texas Medical School at Houston
- MD/MPH - The University of Texas School of Medicine at San Antonio
- MD/MPH - Baylor College of Medicine
- MD/MPH – The University of Texas Southwestern Medical School, Dallas
- MD/MPH - Texas Tech University, Paul L. Foster School of Medicine, El Paso
- MGPS/MPH - The University of Texas at Austin LBJ School of Public Affairs
- MPAff/MPH - The University of Texas at Austin LBJ School of Public Affairs
- MS/MPH - The University of Texas School of Biomedical Informatics
- MSN/MPH - The University of Texas School of Nursing at Houston
- MSW/MPH - University of Houston School of Social Work
- MSSW/MPH - The University of Texas at Austin School of Social Work
- MSSW/MPH - The University of Texas at Arlington School of Social Work
- MBA/MPH - The University of Texas at Brownsville/Texas Southmost College School of Business
- MBA/MPH - The University of Texas at San Antonio College of Business
- PhD/MPH - The University of Texas School of Biomedical Informatics

### **Non-Degree Programs**

The UT School of Public Health offers opportunities for education and training that do not lead to a public health degree. Non-degree programs provide an opportunity to those students to take UT School of Public Health courses for credit. The non-degree student generally is allowed to take a maximum of sixteen credits in School of Public Health courses unless the student is associated with a formally recognized educational collaboration or a certificate program.

### **Certificate Program**

The certificate program is intended for public health practitioners and individuals considering a graduate degree in the field. The five courses in these non-degree programs cover the core content of the disciplines that are basic to public health and are available at all campuses. Current certificate programs are:

- General Public Health Certificate
- Public Health Informatics Certificate
- Health Disparities Certificate
- Maternal and Child Health Certificate

### **Professional Training Opportunities**

The University of Texas School of Public Health provides graduate-level academic training and continuing education for professionals in government, business and the general community. Continuing education courses and professional training opportunities are available in the following areas:

- Continuing Education in Health Promotion
- Occupational & Environmental Health
- Continuing Education
- Center for Emergency Research

The UTHealth Advanced Education Programs of the School of Dentistry is composed of three types of students: postgraduate, graduate, and resident.

- A postgraduate student is a dentist registering and paying tuition and fees for courses leading to a certificate in the specialty area.
- A graduate student is a dentist registering and paying tuition and fees for courses leading to a Master of Science degree and a certificate in a dental specialty area.
- A resident is a dentist who receives training in a specialty area, is paid a stipend, and who receives a certificate of completion.
- Residencies are available only in oral and maxillofacial surgery.

## School of Dentistry & Medical School Applicant Scores *Fall 2012 Entering Class*

---

sources: [Phil Pierpont, DDS](#), School of Dentistry; [Patricia Caver](#), Medical School

### Applicant Average Dental Aptitude Test (DAT) Scores Fall 2012 Entering Class

<b>Subject</b>	<b>All Applicants</b>	<b>Enrolled Applicants</b>
<i>Academic Average AA</i>	18.04	19.73
<i>Perception Ability MA</i>	18.41	19.82
<i>Quantitative Reasoning</i>	16.83	18.53
<i>Reading Comprehension</i>	19.29	20.87
<i>Biology</i>	17.80	19.38
<i>Inorganic Chemistry</i>	18.20	19.86
<i>Organic Chemistry</i>	17.98	19.96
Total Science	17.84	19.51
Applicant Average Overall GPA	3.38	3.69

### Applicant Average Medical Comprehensive Aptitude Test (MCAT) Scores Fall 2012 Entering Class

<b>Subject</b>	<b>All Applicants</b>	<b>Enrolled Applicants</b>
<i>Biological Sciences</i>	9.67	10.90
<i>Physical Science</i>	9.20	10.57
<i>Verbal Reasoning</i>	8.72	9.63
Applicant Average	27.59	31.10
Applicant Average Overall GPA		3.54

Notes (pertains to all research tables):

1. Because faculty in the Graduate School of Biomedical Sciences hold their primary appointments in another school/institution, their respective research proposals/awards/expenditures are reported accordingly, and not through GSBS. Prior year figures represent research activity from GSBS Academic A&P staff.
2. Beginning in FY 2011, Medical School research activity includes the Institute of Molecular Medicine.

## MSRDP Summary of Operations *FY 2012*

source: [Angela Smith](#), Medical School

Note: Includes the operations of the nonprofit healthcare corporation.

### For the Year Ended August 31, 2012 (unaudited)

#### Operating Revenues:

Gross Patient Charges		
Gross Patient Charges Related to Uncompensated Care (Note 2)	\$ 506,204,168.00	
Other Gross Patient Charges	<u>225,590,925.01</u>	
Total Gross Patient Charges		\$731,795,093.01
Less: Discounts and Allowances		
Contractual Allowances - Medicaid	(214,656,621.08)	
Contractual Allowances - Medicare	(102,829,227.31)	
Contractual Allowances - Managed Care and Other Insurance	(138,439,512.08)	
Other Unreimbursed Medical Charges	(83,935,035.81)	
Bad Debt Expense	<u>(29,604,071.84)</u>	
Total Discounts and Allowances		<u>(569,464,468.12)</u>
Net Patient Revenues		162,330,624.89
Contractual Revenues		188,619,914.01
Other Operating Revenues		<u>6,749,309.83</u>
<b>Total Operating Revenues</b>		<b>357,699,848.73</b>

#### Operating Expenses:

Faculty Salaries		166,257,313.16
Staff Salaries		74,924,589.05
Fringe Benefits		43,863,982.78
Maintenance and Operations		54,077,869.00
Travel		2,320,950.98
Official Functions		737,454.66
Other Expenses		<u>5,680,176.29</u>
<b>Total Operating Expenses</b>		<b>347,862,335.92</b>

**Operating Income (Loss)** **9,837,512.81**

#### Nonoperating Revenues (Expenses):

Gift Contributions for Operations		
Investment Income		798,107.02
Net Increase (Decrease) in Fair Value of Investments		<u>864.25</u>
<b>Net Nonoperating Revenues (Expenses)</b>		<b>798,971.27</b>

**Income (Loss) Before Other Revenues, Expenses, Gains or Losses** **10,636,484.08**

Transfers In:		
Interfund/Interagency		(8,023,834.60)
Transfers Out:		
Debt Service		(1,951,259.11)
Capital Outlay		(5,194,633.98)
Interfund/Interagency		<u>(23,175.00)</u>
<b>Change in Net Assets</b>		<b>(4,556,418.61)</b>

Net Assets - September 1, 2011 82,541,833.31

**Net Assets - August 31, 2012** (see below) **\$ 77,985,414.70**

Ending Net Assets August 31, 2012 was composed of the following:

Encumbrances	3,981,403.15
Accounts Receivable (less unearned revenue portion)	40,070,603.26
Deposits	124,480.37
Prepaid Expenses	1,078,821.17
Deferred Charges	1,078,821.17
Imprest Funds (from Schedule A-1)	5,672.00
Capital Projects	2,023,070.00
Debt Service	1,990,974.00
Unallocated	<u>28,219,144.42</u>
<b>Total Net Assets</b>	<b>77,985,414.70</b>
