**3. Strategies and Riders (continued)**

GOAL 3: PROVIDE INFRASTRUCTURE SUPPORT

Objective 1: Operations and Maintenance

Strategy 1: Educational and General Space Support ..... 84

Objective 2: Infrastructure Support

Strategy 1: Capital Construction Assistance Projects Revenue Bonds ..... 87

GOAL 4: PROVIDE HEALTH CARE SUPPORT

Objective 1: Dental Clinic Care

Strategy 1: Dental Clinic Operations ..... 89

GOAL 5: PROVIDE NON-FORMULA SUPPORT

Objective 1: Instruction/Operation Non-Formula Items

Strategy 1: Improving Public Health in Texas Communities ..... 91

Strategy 2: Biomedical Informatics Research and Education Expansion ..... 93

Strategy 3: Texas Epidemic Public Health Institute ..... 95

Objective 2: Regional Academic Health Center – Public Health

Strategy 1: Regional Academic Health Center – Public Health ..... 98

Objective 3: Research Non-Formula Items

Strategy 5: Psychiatry and Behavioral Sciences Research ..... 100

Strategy 7: Integrated Care Study For Veterans With Post-traumatic Stress Disorder..... 103

Objective 4: Health Care Non-Formula Item

Strategy 1: Harris County Hospital District ..... 106

Strategy 2: Service Delivery in the Valley/Border Region ..... 108

Strategy 3: Trauma Care..... 110

Strategy 4: Harris County Psychiatric Hospital..... 113

Objective 5: Institutional Support Non-Formula Items

Strategy 1: Institutional Enhancement ..... 115

Objective 6: Exceptional Item Request

Strategy 1: Exceptional Item Request ..... 117

GOAL 7: TOBACCO FUNDS

Objective 1: Tobacco Earnings for Research

Strategy 1: Tobacco Earnings for the UT Health Science Center at Houston ..... 119

Strategy 2: Tobacco Earnings from the Permanent Health Fund for Higher Education No. 810 ..... 121

B. Rider Revisions and Additions Request ..... 124

**4. Exceptional Items**

A. Exceptional Items Request Schedule:

**744 The University of Texas Health Science Center at Houston**

---

The University of Texas Health Science Center at Houston (UTHealth Houston) submits the following Legislative Appropriations Request for fiscal years 2026 and 2027 to the Governor's Office of Budget and Policy and the Legislative Budget Board. The University of Texas System is governed by a Board of Regents and the current members of the Board are included in the organizational chart. Giuseppe N. Colasurdo, M.D., is the president of UTHealth Houston.

OVERVIEW

UTHealth Houston is headquartered in the largest medical complex in the world, the Texas Medical Center. Each year, UTHealth Houston educates and trains more than 5,000 future physicians, nurses, biomedical researchers, dentists, dental hygienists, public health professionals, and informaticians through its six schools and soon seven schools:

- \* McGovern Medical School, the ninth largest school of medicine in the nation and a leading research institution;
- \* Cizik School of Nursing, consistently ranked by US News and World Report as a top 3% nursing school in the nation and ranked number one in Texas. Cizik is also ranked nationally number 18 in NIH research funding;
- \* M.D. Anderson UTHealth Houston Graduate School of Biomedical Sciences, a shared school with UT MD Anderson Cancer Center training future scientists in laboratories at both institutions;
- \* School of Dentistry, founded in 1905, one of the oldest health related schools in Texas, provides reduced cost dental care to thousands of indigent patients each year;
- \* School of Public Health, with six locations across the state in Austin, Brownsville, Dallas, El Paso, Houston, and San Antonio, is the fourth largest graduate school of public health in the nation;
- \* McWilliams School of Biomedical Informatics, the only standalone school in the nation to combine medicine, computer science, engineering, and artificial intelligence to transform data to power human health. It's the largest and one of the highest-ranked graduate level informatics programs nationally; and
- \* The new School of Behavioral Health Sciences, enrolling in Fall of 2025, is the only school of its kind in the nation collaboratively training the whole mental health workforce team including psychiatrists, psychologists, nurses, social workers, and importantly psychiatric technicians. Funding for the new school is one of UTHealth Houston's top priorities.

UTHealth Houston faculty, fellows, residents, and students deliver excellent clinical care through more than 1.8 million outpatient visits to UT Physicians, the faculty practice of the McGovern Medical School, and thousands more to UT Dentists, UT Health Services (Cizik nursing), and other outpatient services. UTHealth Houston providers also serve patients in inpatient and outpatient settings with many partner hospitals and clinics including:

- \* Memorial Hermann Health System, including the TMC campus with one of the busiest Level I trauma centers in the nation;
- \* Harris Health, including LBJ hospital, the state's busiest Level III trauma center and with its replacement hospital starting construction, it will be Houston's third Level I trauma center;

---

**744 The University of Texas Health Science Center at Houston**

---

- \* Children’s Memorial Hermann, one of the nation’s busiest Level I pediatric trauma centers;
- \* Memorial Hermann The Institute for Rehabilitation and Research (TIRR), ranked the best rehabilitation hospital in the nation; and
- \* Many other Houston hospitals and clinics.

UTHealth Houston is also heavily invested in behavioral health care including two large inpatient hospitals on one campus :

- \* UTHealth Harris County Psychiatric Center (HCPC): the building is jointly owned by Harris County and the Texas Health and Human Services Commission (HHSC) and UTHealth Houston operates, staffs, and is responsible for all patient care and business operations of the 274-bed facility.
- \* John S. Dunn Behavioral Sciences Center at UTHealth Houston (Dunn): opened in March 2022, the building is owned by HHSC and like HCPC, UTHealth Houston operates and staffs the hospital. The 264-bed hospital was funded by the Texas Legislature and opened on time and under budget.
- \* Combined, these 538 beds make this campus the largest academic behavioral health campus in the nation.

UTHealth Houston has integrated behavioral health services into UT Physicians, Harris Health, and other primary care and multispecialty clinics across the city, including zip codes that are listed as medically underserved areas.

UTHealth Houston is also a major participant in the Texas Child Mental Health Care Consortium, including providing telemedicine visits for 19 ISDs for the Texas Child Health Access Through Telemedicine (TCHAT) and more than 500 enrolled primary and pediatric care providers through the Child Psychiatry Access Network (CPAN).

Additionally, in 2025, Dunn will open a new urgent care and pediatric/adolescent day treatment center to provide intensive outpatient and partial hospitalization programs to improve access to care with a focus on adolescent depression and self-harm behaviors. This program should help reduce emergency department visits, costly inpatient hospitalizations, and provide early intervention behavioral health care when it is most effective.

#### SIGNIFICANT CHANGES IN PROVISION OF SERVICE/EXTERNALITIES

Like the rest of the country, inflation is one of the many issues facing UTHealth Houston. The cost of supplies for clinics, food for inpatient services at the behavioral health hospitals, and the cost of wages are a few examples of inflation impacts on UTHealth Houston, not to mention the personal impact of inflation on our students, employees, and patients.

Another significant issue for UTHealth Houston and for the state is the cut in Medicaid supplemental funding. Unfortunately, CMS has forced Texas to rework many programs, resulting in the loss of important supplemental funding, including the Delivery System Reform Incentive Payment (DSRIP), the Network Access Improvement Program (NAIP), and Uncompensated Care (UC). These programs have been “replaced” for the state’s HRI physician practices by the Texas Incentives for Physicians and Professional Services (TIPPS). However, due to the rules dictated by CMS, TIPPS falls over \$100 million short of previous funding for just UTHealth Houston. This has led to clinic closures in underserved areas (Beaumont and the Sickie Cell Clinic) and the loss of some behavioral health services in NAIP-funded clinics. UTHealth

---

**744 The University of Texas Health Science Center at Houston**

---

Houston is working on a variety of solutions to maintain the clinics in underserved areas, but as costs rise, that is getting more difficult.

**EXCEPTIONAL ITEM FUNDING REQUESTS**

**UTHealth Houston School of Behavioral Health Sciences**

The demand for mental health treatments far exceeds the current Texas workforce capacity to deliver services. There are only 853 child and adolescent psychiatrists in Texas and 203 of Texas' 254 counties lack a single child and adolescent psychiatrist (80%). Approximately 350 of HHSC's state funded hospital beds are closed primarily due to lack of behavioral health staffing (UTHealth Houston provides psychiatric telehealth services to the state hospitals; however, many of their staff issues are with the availability of onsite nursing and psych tech staffing). The average waiting time for competency restoration (in county jails) for non-max security beds to over 237 days. The total waitlist as of June 2024 was approx. 1,850 persons for both max and non-max security beds. For perspective, the waitlist was approximately 900 in 2019.

With tremendous legislative support, UTHealth Houston opened the new Dunn Behavioral Sciences Center (Dunn) in March 2022 adjacent to the existing UTHealth Harris County Psychiatric Center (HCPC). Combined, this campus is home to the largest academic behavioral health complex in the nation. Faculty from the Faillace Department of Psychiatry and Behavioral Sciences at the McGovern Medical School operate and staff these hospitals and staff many outpatient clinics through UT Physicians and Harris Health, among others. UTHealth Houston is a provider in the Texas Child Mental Health Care Consortium with more than 500 pediatrician or primary care offices enrolled in the Child Psychiatry Access Network (CPAN) and 19 school districts in the Texas Child Health Access Through Telemedicine (TCHAT).

With these resources generously provided primarily by the Texas Legislature, UTHealth Houston leadership began exploring ways to leverage these assets to increase the workforce of Texas and improve mental health education and treatment.

The new UTHealth Houston School of Behavioral Health Sciences (SBHS) was the result of these leadership discussions. SBHS will offer world-class accredited graduate degree and certificate programs to address the growing shortage of mental health providers. SBHS will integrate expertise and innovation in psychiatry, psychology, neurology, pediatrics, social work, family counseling, nursing, public health, clinical training, and research. SBHS will eventually offer over 30 new degree and certificate programs for mental health professionals and expand four existing degree programs over the next 10 years.

The programs offered by the new school will give our graduates the opportunity to transition into clinical internships, providing them the clinical hours and experiences needed to apply for their state license to practice. This training will be done as a behavioral health team, to better prepare the student for the workplace and create a robust pipeline of mental health providers with varied mental health specialization.

UTHealth Houston is requesting an exceptional item of \$10.5 million per year (\$21 million/biennium) for the new SBHS. This funding will be used to launch this unique school, recruit the necessary faculty and staff for training, and importantly, recruit students and keep tuition low for students.

**Texas All Payor Claims Database**

Texans face many healthcare challenges today, and understanding the price and quality of their care is often out of reach for most consumers. Since Texans are seeking to reduce rising healthcare costs and increase transparency, HB 2090 (87th session) created the Texas All Payor Claims Database at UTHealth Houston. The TX-APCD is the only comprehensive, public source for transparent, up-to-date healthcare cost information in Texas.

---

**744 The University of Texas Health Science Center at Houston**

---

What does healthcare cost? Where is the best quality provided? The TX-APCD will maintain a comprehensive database and public information portal to provide information for consumers, reduce costs, and improve healthcare in Texas. TX-APCD will provide the following data:

- \* Report on healthcare spending, utilization, and provider performance.
- \* Inform state policy and regulatory analysis -- i.e. understand which services are over/under utilized and the cost of those services.
- \* Improve public health and chronic disease data (diabetes, mental illness, heart disease, etc.)
- \* Provide reliable data for healthcare research and evaluation.

TX-APCD Benefits include:

- \* **Transparency:** The TX-APCD provides transparency in health care costs and utilization, which can help patients make more informed decisions about their health care.
- \* **Fiscal Responsibility:** The TX-APCD can be used to identify cost drivers to help patients and health care providers reduce costs and improve the affordability of health care.
- \* **Quality Improvement:** The TX-APCD can be used to track the performance of healthcare providers and systems which can help identify opportunities for quality improvement.
- \* **Research:** The TX-APCD is a valuable resource for researchers who use the data to study health care trends and patterns, as well as evaluate the effectiveness of health care policies and programs.
- \* **Public Health:** The TX-APCD can provide disease prevalence and incidence surveillance to help identify potential health threats to Texans and track the spread of infectious diseases.
- \* **Policy Making:** Data from the TX-APCD can be used to inform health policy decisions and help identify areas of the health care system that may require additional resources or attention.

Once fully funded, the TX-APCD will create a public access portal for Texans to search and retrieve health care information and reports on a regional and statewide basis. The reporting will address health care costs, quality, utilization, outcomes, and disparities, as well as improve access to health care services and population health.

TX-APCD has not yet received state funding. However, UTHealth Houston is committed to establishing this valuable resource for the state and has identified partial private sector matching funds. UTHealth Houston requests \$9 million in biennial funding to establish a fully functional TX-APCD.

Texas Epidemic Public Health Institute (TEPHI)

**Administrator's Statement**

10/9/2024 10:20:16AM

89th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**744 The University of Texas Health Science Center at Houston**

---

TEPHI was created by the Legislature in 2021 to keep Texans safe and the economy strong by strengthening the capacity and resiliency of all Texas communities to respond to future infectious disease outbreaks. One of the most successful TEPHI programs is the statewide Texas Wastewater Environmental Biomonitoring (TexWEB) network, which (1) acts as an early detection system for community spread of more than 3,000 pathogens, (2) establishes a long-term program to detect and monitor pathogens with potential to impact human health, including novel and emerging pathogens and variants, and (3) creates an early warning system for state leadership, DSHS, and local public health authorities. TexWEB is a collaboration of UTHealth Houston School of Public Health, TEPHI, Baylor College of Medicine, and El Paso Water, among other partners and employs cutting-edge technology that is not currently used anywhere else in the world.

Federal funding was requested to maintain TexWEB, but TEPHI has been excluded from the Centers Disease Control and Prevention's (CDC) national network. Participation would allow for the possibility of federal funding but would require TexWEB to report its data to Verily (CDC's sole vendor owned by Google), which would relinquish the state's control regarding how the data is used.

TexWEB is now testing samples from dozens of wastewater treatment plants throughout Texas, including along the border and at international airports. Unlike the CDC/Verily Wastewater Monitoring program, TexWEB can detect more than 3,000 pathogens (including naturally occurring or maliciously manufactured variants) and keeps Texas data in Texas. TEPHI reports data directly to state and local public health officials weekly to:

- \* Detect emerging threats quickly, including along the border & at international airports;
- \* Relay information rapidly to public health response agencies; and
- \* Prepare & inform clinicians and health systems through DSHS.

Due to challenges related to securing federal funding to maintain TexWEB and guard against emerging public health threats at our border, UTHealth Houston is requesting \$20 million for the biennium TEPHI's TexWEB (half of the original appropriation for FY2022-FY2023).

**Capital Construction Assistance Project**

UTHealth Houston requests a Capital Construction Assistance Project (CCAP) for a new construction building on the Texas Medical Center campus called the "UTHealth Houston Education, Research, & Innovation Core Building" (UTHealth Houston ERIC Building). The request is for a \$100 million CCAP for the \$250 million+ UTHealth Houston ERIC Building. This 250,000+ square foot facility will house wet labs, research support cores, classrooms, common equipment rooms, shared support spaces, and other infrastructure for the seven schools of UTHealth Houston whose total research portfolio for fiscal year 2024 exceeded \$400 million. This new building will support advanced biomedical research, educate the next generation of medical professionals and researchers, and allow UTHealth Houston to continue its growth in education, research, and innovation.

**Dental Clinic Operations**

The state's four dental schools and their clinical facilities function much like hospitals and ambulatory care sites with UTHealth Houston having over 300 operatories (dental chairs) in the School of Dentistry building. But unlike medical students that have residencies and fellowships after graduation, dental students rely on the schools of dentistry as their comprehensive training grounds, ensuring they are clinically competent upon graduation ("ready to practice"). The proposed Dental Clinic Operations (DCO) methodology recognizes the importance of supporting the operational costs of these facilities.

**Administrator's Statement**

10/9/2024 10:20:16AM

89th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**744 The University of Texas Health Science Center at Houston**

---

As students must be ready to practice upon graduation, the quality and quantity of clinical experiences a student performs during their clinical phase of education is critical to produce fully trained, competent dentists. Students receive comprehensive clinical experiences in treating all types of patients (newborn, children, adults, geriatric adults, medically complex including IDD, and veterans) through the entire continuum of oral care: urgent, disease control and prevention, and restorative care. On average, the three legacy schools (UTHealth Houston, Texas A&M Health, and UT Health San Antonio) each see approximately 65,000 patient visits per year in its facilities. Most of the patients seeking treatment from our student clinics are low-income and often only able to pay for urgent or limited care. The school is often the provider of last resort for this population; therefore, it is critical that our fees be favorable to the population we serve, the uninsured or under-insured. Our fees are at least 30 - 50% less than private practice fees. By lowering the barrier of cost for this population, it assures that our students have the necessary experiences to graduate as competent health professionals while at the same time providing essential oral health care for this population. However, this results in an annual net loss in clinical operations which must be covered with other funds. This has a downstream impact on education, particularly on recruiting qualified faculty, increasing research capacity, and the cost of dental education to students.

While the legislature appropriates a certain amount of general revenue to each dental school through a DCO line item, the current funding is inconsistent across the schools and lacks any metrics associated with the amount appropriated to each school. Furthermore, over time the amount has decreased, for instance in FY2000-2001 the DCO provided to UTHealth Houston was \$2.5M per biennium. It currently is \$1.3M per biennium. Additionally, there is inconsistent funding for all four of the Texas schools: Texas A&M Health \$72,700; UTHealth Houston \$1.3 million; UT Health San Antonio \$3.2 million; and Texas Tech University Health Sciences Center El Paso \$6 million (new school that is using the DCO as startup funds).

The three legacy dental schools propose to increase all three schools to at least \$6 million per biennium for each school.

**FORMULAS**

UTHealth Houston participated in the recommendations of the Texas Higher Education Coordinating Board (THECB) to increase formula funding rates for HRIs and other recommendations. Part of the recommendations are regarding the mission specific formula (MSF) which has been a key driver in research successes at UTHealth Houston (see full color MSF insert).

**ARTICLE II, HEALTH AND HUMAN SERVICE COMMISSION APPROPRIATION, MENTAL HEALTH SERVICES**

UTHealth Houston Harris County Psychiatric Center and  
John S. Dunn Behavioral Sciences Center at UTHealth Houston

The UTHealth Houston Harris County Psychiatric Center and the newly opened John S. Dunn Behavioral Sciences Center at UTHealth Houston, collectively, make up the largest academic behavioral health care complex in the nation. Both inpatient facilities were built with substantial funding from the Texas Legislature.

UTHealth Houston staffs and operates both hospitals, totaling 538 beds, in the Texas Medical Center. HCPC, opened in 1986, has 274 beds, 171 of which are state-funded to provide indigent care. HCPC's physical building is equally owned by Harris County and the Texas Health and Human Services Commission (HHSC). The Dunn building, opened in March 2022, is owned by HHSC, and 168 of the 264 beds are state funded to provide indigent care.

As with most health care entities, costs have increased substantially due to inflation since state rates for HCPC and the Dunn were established for the 2024-2025

**744 The University of Texas Health Science Center at Houston**

---

biennium, and current reimbursement rates funded through HHSC do not cover the costs of providing behavioral health services to these patients. The main drivers of the increase are market wage adjustments to address recruiting and retention of behavioral healthcare workers, increases in supply costs, and general inflation affecting all cost categories including food services, housekeeping, repairs, and maintenance.

An updated rate of \$782 per bed per day would cover the hospitals' predicted costs for FY2026 and 2027 using a modest inflation rate of only 2.5% for each fiscal year above the current fiscal year. The funding is needed to keep providing the same number of state funded beds to indigent patients. The request for HCPC is an increase of \$10,236,060 for the biennium from current state funding. The request for Dunn is an increase of \$10,056,480 per biennium from current state funding.

SUPPLEMENTAL REQUEST FOR FY 2022-2023 BIENNIUM

UTHealth HCPC Renovations (FY24-25)

UTHealth Houston Harris County Psychiatric Center (HCPC) was built in 1986 and despite the excellent maintenance of the facility, it is showing its age, especially next door to the new Dunn Behavioral Science Center. The legislature appropriated some funds in the last session for minor maintenance repairs and to fill the bed rate deficit between the HCPC and Dunn. UTHealth Houston used some of the funds for behavioral health care and to start renovation planning of the building opened when Ronald Reagan was President.

UTHealth HCPC requests \$12,863,315 for the current biennium for the renovation of HCPC. This renovation includes patient care areas, patient/visitor areas, physical plant items, and other necessary life and safety updates for the building.

ARTICLE III TEXAS EDUCATION AGENCY, Rider 40 - Early Childhood Development Programs at UTHealth

Children's Learning Institute

A critical component of UTHealth Houston's McGovern Medical School's Department of Pediatrics, the Children's Learning Institute (CLI) directs numerous nationally recognized training, research, and clinical programs, including the Texas School Ready (TSR) Project, as well as multidisciplinary programs ranging from the science of neurodevelopment to researching and identifying the best therapies for children with autism. TSR serves at-risk infants, toddlers, and preschool-aged children and their teachers through shared resources between public and private early childhood education programs in two models, TSR Comprehensive and TSR Online, both of which are supported by the CLI Engage technology platform, a comprehensive online professional development and progress monitoring platform. Both programs are implemented through partnerships with local and regional organizations that support education in Texas communities.

TSR now reaches more than 1,600 communities (including 1,414 school districts and charter schools), 63,946 teachers, and 631,455 at-risk children annually. This represents a significant increase from 2014, when TSR served 2,565 teachers and 48,097 at-risk children.

While the growth from 2014 to 2024 is significant, it was considerably stymied by funding decreases by the legislature that prevented enhancements to the platform as it

---

**744 The University of Texas Health Science Center at Houston**

---

expanded to meet TEA needs and serve many more users.

Current funding is \$3.25 million per year. UTHealth Houston requests restoration of funding levels to \$7 million per year through TEA rider 40.

Expanded funding would allow UTHealth Houston to extend the current user support model for CLI Engage to provide the services requested and needed by the expanding users, including live/phone and customized support based on local goal setting. UTHealth Houston will provide implementation support to Education Service Centers (ESC) to enhance local utilization of the TSR tools on CLI Engage to support teachers and administrators with data-based early education decision-making. Additionally, UTHealth Houston will enhance the Texas Early Childhood Professional Development System (TECPDS, state early education workforce registry) to provide reports to TEA and districts on teacher qualifications, ongoing training, and professional development planning by leveraging this existing system with significant state investment. Finally, UTHealth Houston will enhance student reporting on CLI Engage with dynamic visualizations so schools, teachers, and families have access to more readable information throughout the school year to understand student progress and make data-based instructional planning decisions.

#### POLICY LETTER

UTHealth Houston appreciates the direction given in the policy letters from the Offices of the Governor, Lieutenant Governor, and Speaker. As an example of compliance with the policy letters, UTHealth Houston's new School of Behavioral Health Sciences (SBHS) exceptional item request relates to the stated "operational funding for the mental health facilities authorized by the 88th Legislature" priority in the policy letter by providing the behavioral health workforce for those new facilities. The Texas Epidemic Public Health Institution (TEPHI) request enhances security at our borders by monitoring wastewater for dangerous pathogens, naturally occurring or maliciously manufactured, to give state leadership, the Department of State Health Services, and local public health authorities the early warning system of emerging dangerous pathogens that could threaten Texans.

#### BACKGROUND CHECKS

Per Government Code Sec. 411.094 and Education Code Sec. 51.215, UTHealth Houston designates all employment positions as security sensitive positions and conducts national and state background checks on all candidates. This criminal background information may not be released or disclosed to any unauthorized person except under a court order.

#### CONCLUSION

UTHealth Houston is pleased to offer this Legislative Appropriations Request for FY 2026-2027. Below is a recap of the requests in this administrator's statement:

\* UTHealth Houston School of Behavioral Health Sciences (SBHS) – continuing to build on the unprecedented investments in mental health by the Texas Legislature, the SBHS will increase the number of trained professionals for state-owned mental health hospitals and other providers, advances quality outcomes, and improves access. Request is \$10.5 million per year (\$21 million for the biennium).

\* Texas All Payor Claims Database (TX-APCD) – for the first time, the Texas Legislature and the public will have access to aggregated and analyzed data on health care claims and related payment data to increase public transparency of health care costs and quality. Request is \$9 million for the biennium.

**Administrator's Statement**

10/9/2024 10:20:16AM

89th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**744 The University of Texas Health Science Center at Houston**

---

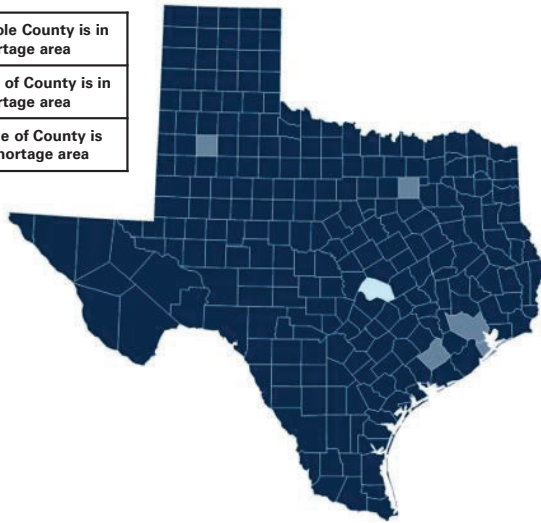

- \* Texas Epidemic Public Health Institute (TEPHI) – continuing the successful TexWEB wastewater pathogen monitoring program for naturally occurring or maliciously manufactured threats that may be introduced at the border or through our airports and quickly affect the entire state. Request is \$20 million for the biennium (half of the original appropriation in FY2022/FY2023).
- \* Capital Construction Assistance Project funding of \$100 million toward an at least \$250 million UTHealth Houston Education, Research, & Innovation Core Building (ERIC) on the Texas Medical Center campus.
- \* Funding the Dental Clinical Operations line item for the three legacy dental schools, UTHealth Houston, UT Health San Antonio, and Texas A&M Health at least \$6 million per school/biennium to support their “ready to practice” upon graduation requirement.
- \* Formula funding recommendations from the THECB HRI Formula Advisory Committee.
- \* Article II funding is requested through HHSC for the UTHealth Harris County Psychiatric Center and the Dunn Behavioral Sciences Center at UTHealth Houston at the same bed rate of \$782 per bed day for a total of \$193.5 million for the biennium for both facilities.
- \* Article II supplemental funding request of \$12,863,315 in current biennium will be used to support badly needed deferred maintenance at HCPC, patient area renovation projects, necessary life and safety updates, and improved areas for patients and their visitors.
- \* Article III, Texas Education Agency funding for the Children’s Learning Institute to continue their excellent work with teachers to improve early childhood education statewide. The request is to restore funding back to \$7 million per year (\$14 million/biennium).

Texas' mental health workforce shortage has reached an all-time high with more than 95% of Texas counties designated as a Mental Health Shortage Areas (more than 30,000 residents per clinician). This leaves many patients and families with little or no access to critical mental healthcare. Since nearly half of all Texans will have a behavioral health issue in their lifetime – from depression to bipolar disorder to substance use problems – Texas must increase the behavioral health workforce to meet the increased needs of children and families. The State's current mental health care gaps are critical, and increasing the workforce with the UTHealth Houston School of Behavioral Health Sciences is an essential part of the workforce solution.

### Mental Health Shortage Areas

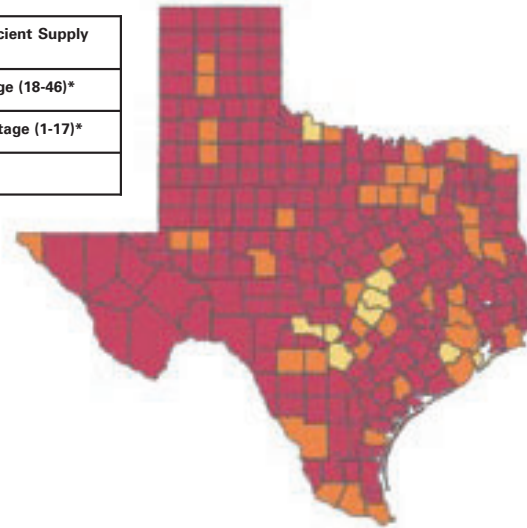

Dark Blue	Whole County is in shortage area
Medium Blue	Part of County is in shortage area
Light Blue	None of County is in shortage area

- 95% of Texas Counties are Mental Health Shortage Areas.
- The average wait time for an in-person mental health appointment is 67 days.
- Approx 25% of state hospital beds are closed due to behavioral health staff shortage.

### Shortage of Child and Adolescent Psychiatrists

Green	Mostly Sufficient Supply (>=47)
Yellow	High Shortage (18-46)*
Orange	Severe Shortage (1-17)*
Red	No CAPs

- Every county in Texas has either a "high shortage" or "severe shortage" of a Child and Adolescent Psychiatrists (CAPs).
- 80% of Texas counties do not have a single practicing CAP.
- Suicide is the 2nd leading cause of death among adolescents.
- Approx appointment wait time for CAP is 3 months.
- Rates of preteen suicide (ages 8-12) have been increasing by approx. 8% per year since 2008 (NIH).

**LAR Request - \$21 million (FY26-27)** UTHealth Houston requests exceptional item funding of \$21 million in biennial funding to launch the School of Behavioral Health Sciences. Funding will support staff and faculty recruitment and keep tuition low as the schools adds students and expands class sizes in the coming years.

Sources: Texas Statewide Behavioral Health Strategic Plan, Texas Health and Human Services Commission; The Commonwealth Fund, May 18, 2023, "Understanding the U.S. Behavioral Health Workforce Shortage"; American Academy of Child and Adolescent Psychiatry

**Building the Behavioral Health Workforce of Texas**

UTHealth Houston’s new School of Behavioral Health Sciences (SBHS) is the solution to a complete continuum of mental healthcare in Texas. SBHS will be a fully dedicated, comprehensive school of unique degree programs for mental healthcare professionals, including masters and doctoral level, in addition to new certifications, postdoctoral fellowships, clinical internships, and clinical fellowships. SBHS will create a robust pipeline of mental health providers for in-demand mental health specialties to create new access to care and utilize UTHealth Houston’s extensive inpatient and outpatient resources. SBHS will also give our graduates the opportunity to transition into clinical internships and provide them with the clinical experience needed for licensure to serve patients.

**What will SBHS offer?**

- **35 new degrees and certificates with 300+ graduates per year**
- Dunn Behavioral Science Center, 264 inpatient hospital beds; Harris County Psychiatric Center, 265 inpatient hospital beds
- outpatient services at 37 community clinics
- telemedicine services statewide
- UTHealth Houston’s network of approx. 350 mental healthcare providers.

**LAR Request - \$21 million (FY26-27)** UTHealth Houston requests exceptional item funding of \$21 million in biennial funding to launch the School of Behavioral Health Sciences. Funding will support staff and faculty recruitment and keep tuition low as the schools adds students and expands class sizes in the coming years.

Sources: Texas Statewide Behavioral Health Strategic Plan, Texas Health and Human Services Commission; The Commonwealth Fund, May 18, 2023, "Understanding the U.S. Behavioral Health Workforce Shortage"; American Academy of Child and Adolescent Psychiatry

The 86th Texas Legislature (2019) established UTHealth Houston’s Performance-Based Research Operations formula funding (or, Mission Specific Formula, MSF). Since that time, the MSF has successfully supported enhanced research capacity at the institution, assisted in leveraging external research grants and gifts, and supported the expansion of UTHealth Houston’s overall research operations. The MSF has also been instrumental in recruiting research talent from all over the world to the Texas Medical Center, helped retain the best and brightest researchers at UTHealth Houston, and funded cutting-edge research to treat and prevent many life-threatening diseases, including cancer, stroke, and dementia. **Maintaining MSF funding is essential to UTHealth Houston’s research and clinical care, including critical research for stroke, cancer, and aging.**

**Institute for Stroke and Cerebrovascular Diseases**

Stroke is a major global health problem as the second cause of death and a leading cause of adult disability worldwide. To address the full continuum of stroke care (from acute treatment to hospitalization to rehabilitation), The Stroke Institute sustains highly successful research in acute stroke treatment and is developing new areas of research in stroke: recovery, prevention, health services, **AI technology**, population health, pain management, pediatrics, vascular cognitive impairment, and mental health impacts from stroke.

**Texas Therapeutics Institute (TTI)  
An Academic Drug Discovery Center**

Located in the heart of the Texas Medical Center, TTI research focuses on the establishment of therapeutics and the development of new life-saving drugs, including multiple new cancer treatments and therapies for heart disease.

TTI’s mission and work in translational research and drug discoveries are supported through MSF funding and under the leadership of Zhiqiang An, Ph.D. In particular, Dr. An’s developments utilize proteins called antibodies that can be engineered to latch onto tumor cells and disrupt their growth.

- 45 drug patents filed
- 15 drug patents issued
- 10 drugs in clinical development/trials

**UTHealth Houston’s Institute on Aging**

The mission of UTHealth Houston’s Institute on Aging is to be the national leader in innovations, education, and training for healthcare that serves older adults. The institute is developing a unique workforce, undertaking research, and disseminating innovations that enable older adults to achieve what matters most in their healthcare, health, and lives. Talented faculty and researchers are continually work to discover and translate advances in the biomedical, behavioral, and population health sciences for older adults.

LAR request – Maintain and fully fund the Performance-Based Research Operations Formula Funding for UTHealth Houston and all Health-Related Institutions to support critical healthcare research and development of new treatments and cures.

Texans face many healthcare challenges today, and understanding the price and quality of their care is often out of reach for most consumers. Since Texans are seeking to reduce rising healthcare costs and increase transparency, HB 2090 (87th session) created the Texas All-Payer Claims Database at UTHealth Houston. **The TX-APCD is the only comprehensive, public source for transparent, up-to-date healthcare cost information in Texas.**

National Health Expenditures (% of GDP)

Health Care Expenditures per Capita, state of Texas: 1991-2020.

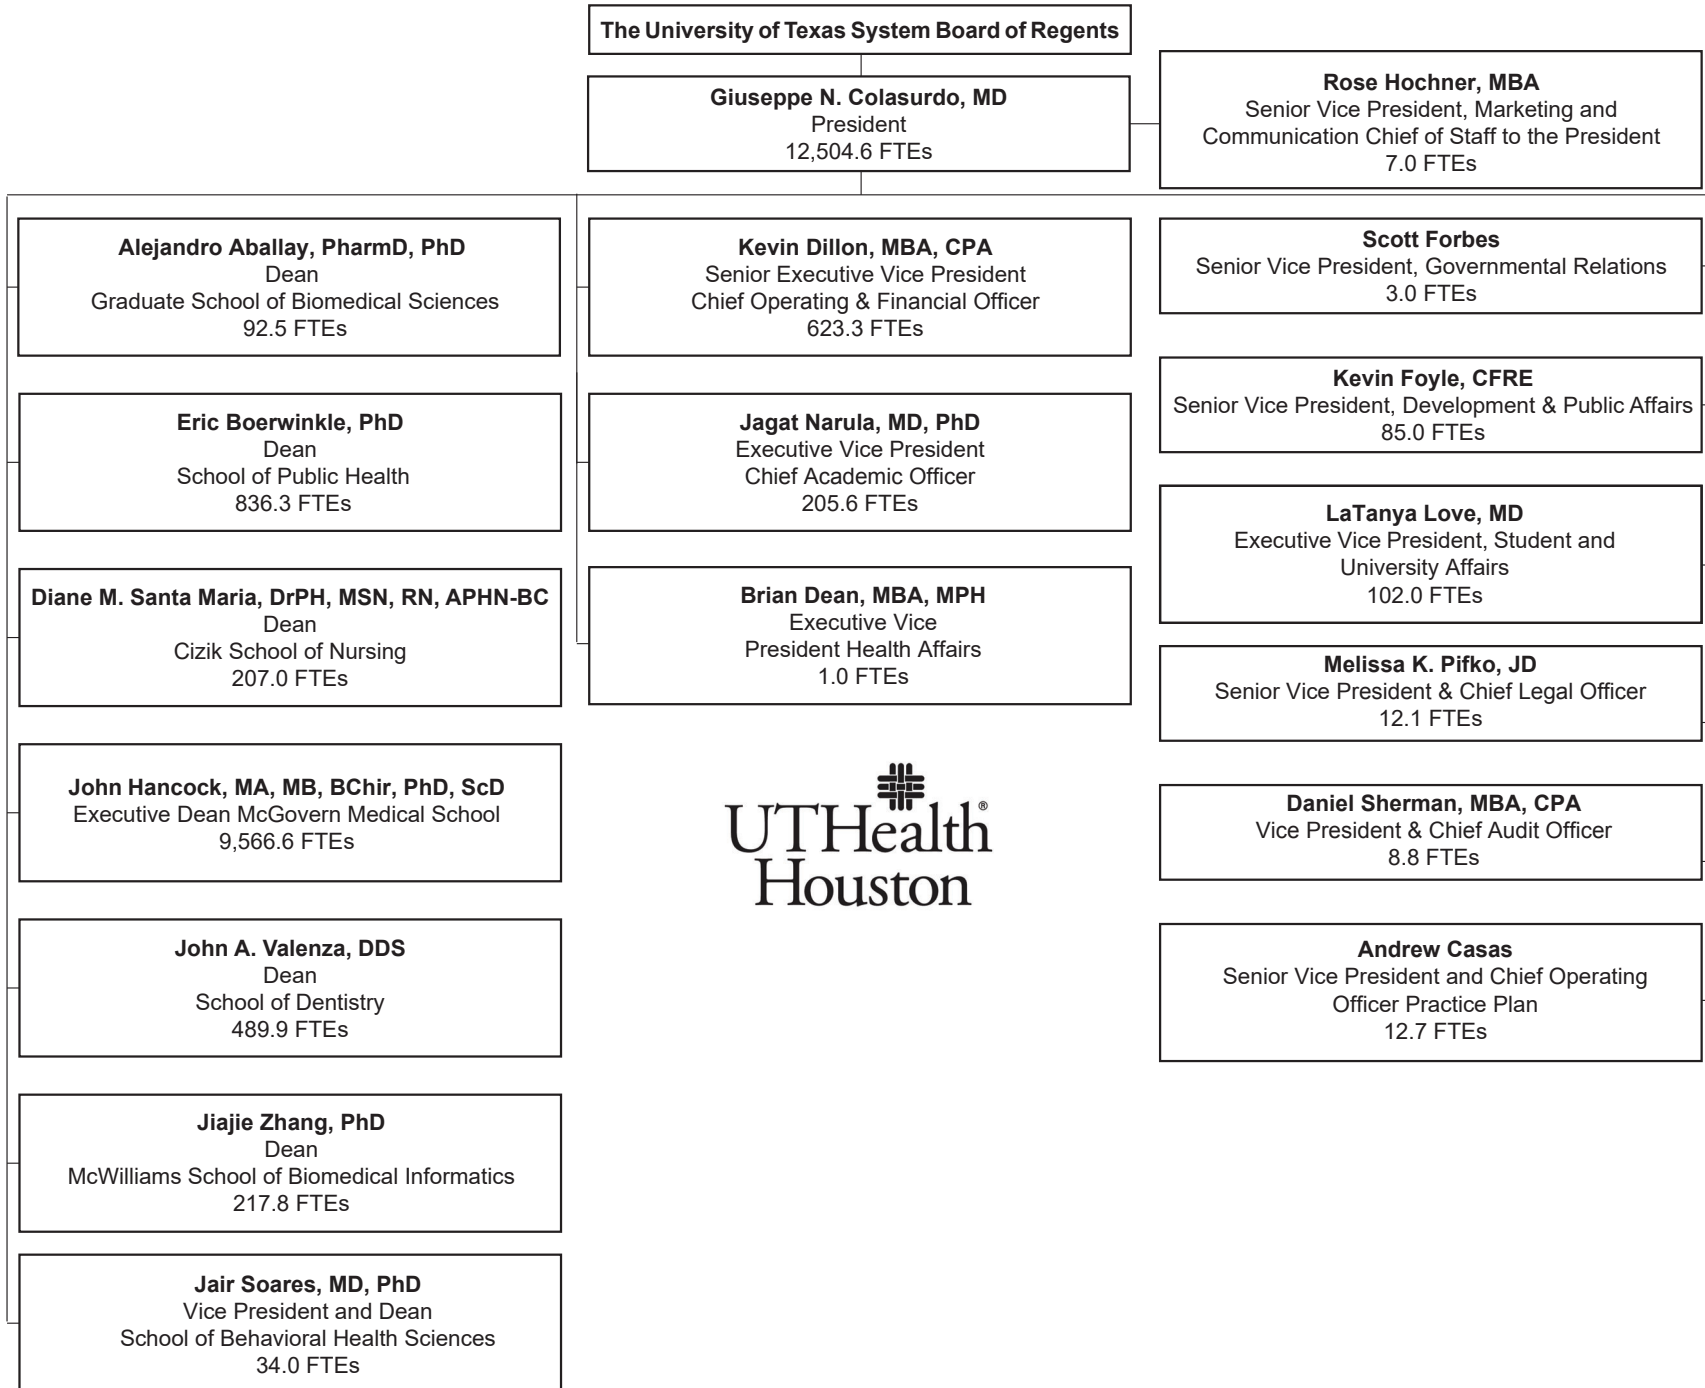

SOURCE: The Centers for Medicare and Medicaid Services (CMS) Office of the Actuary produces Health Expenditures by State of Residence every five years. New data is anticipated in 2025.

### What does healthcare cost? Where is the best quality of care?

The TX-APCD will allow patients and policy makers to make informed decisions about their healthcare and provide recommendations to reduce total healthcare spending and improve health outcomes for Texans. TX-APCD will also provide data on healthcare spending, utilization, and provider performance. TX-APCD will also improve availability of chronic disease data (diabetes, mental illness, heart disease, etc.) and provide reliable data for healthcare research.

**LAR Request – \$9 million (FY 26-27)** UTHealth Houston requests \$9 million in biennial funding to establish a fully functional TX-APCD. UTHealth Houston is committed to establishing this valuable resource for the state and has identified partial private sector matching funds to leverage state funding.

# The University of Texas Health Science Center at Houston Executive Organization

## **The University of Texas Health Science Center at Houston Executive Organization Descriptions**

### **Office of the President**

**President** – Giuseppe N. Colasurdo, M.D., holds primary responsibility for the health science center’s success in educating students, conducting groundbreaking research, and maintaining a reputable and financially secure clinical practice.

**Senior Executive Vice President, Chief Operating Officer** – Kevin Dillon, M.B.A. C.P.A., provides financial oversight to each of the health science center’s seven schools, the Dunn Behavioral Sciences Campus and the Brown Foundation Institute of Molecular Medicine as well as the medical practice plan. Mr. Dillon is also responsible for the health science center’s central financial and administrative services and campus-wide strategic planning efforts.

**Senior Vice President and Chief Academic Officer** – Jagat Narula, MD, Ph.D., works with the six deans and members of the UTHealth Houston leadership team to advance the academic mission and promote excellence in education and research. This includes leading a team of faculty and administrators to oversee strategic planning and implementation of the university’s education and research platform.

**Executive Vice President, Health Affairs** – Brian Dean, MBA, MPH, has a focus on strategic growth of UTHealth Houston's clinical footprint and infrastructure and ensuring that delivery models are responsive to the needs of local communities and patients from across the globe.

### **Deans**

**McGovern Medical School** – John F. Hancock, MA, MB, BChir, ScD, Ph.D., directs the school’s academic, research, and outreach activities.

**School of Dentistry** – John A. Valenza, D.D.S. directs the school’s academic, research, clinical, and outreach activities.

**School of Public Health** – Eric Boerwinkle, Ph.D., directs the school’s academic, research, and outreach activities.

**School of Biomedical Informatics** – Jiajie Zhang Ph.D., directs the school’s academic, research, and outreach activities.

**Graduate School of Biomedical Sciences** – Alejandro Aballay, PharmD, Ph.D., directs the school’s academic, research, and outreach activities.

**Cizik School of Nursing** – Diane M. Santa Maria, DrPH, MSN, RN, APHN-BC, directs the school’s academic, research, clinical, and outreach activities.

**School of Behavioral Health Sciences** – Jair Soares, MD, PhD, directs the school’s academic, research, clinical, and outreach activities.

STRATEGY DESCRIPTION AND JUSTIFICATION:

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, student services and institutional support. The formula for this strategy is based on weighted medical student headcounts. The rate per weighted student headcount or full time equivalent is established by the Legislature each biennium.

EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:

(1) - Formula funded strategies are not requested in 2026-27 because amounts are not determined by institutions.

					<b>BL 2027</b> <sup>(1)</sup>

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, student services and institutional support. The formula for this strategy is based on weighted dental hygiene student full time equivalent. The rate per weighted student headcount or full time equivalent is established by the Legislature each biennium.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

**EXPLANATION OF BIENNIAL CHANGE (includes Rider amounts):**

<u>STRATEGY BIENNIAL TOTAL - ALL FUNDS</u>		<u>BIENNIAL</u>	<u>EXPLANATION OF BIENNIAL CHANGE</u>	
Base Spending (Est 2024 + Bud 2025)	Baseline Request (BL 2026 + BL 2027)	CHANGE	\$ Amount	Explanation(s) of Amount (must specify MOFs and FTEs)

------	-------------	----------	----------	----------	---------	---------

According to the Texas Comptroller, health care costs account for nearly half of the State’s budget and are increasing at a faster pace than population growth and inflation. These costs are largely driven by the growing prevalence of chronic disease, something that clinical care is ill equipped to address on its own. In fact, economic and behavioral factors determine an estimated 80 percent of health outcomes. In addition to chronic disease, Texas faces public health, safety and economic challenges related to disaster preparedness and emerging (and re-emerging) infectious diseases due to high-consequence pathogens.

Addressing chronic disease and supporting public health requires a robust and well-trained workforce and infrastructure that can bridge the gap between the fields of public health and medicine and work with and in communities to promote population health. The UTHealth Houston School of Public Health (UTSPH), with locations in Austin, Brownsville, Dallas, Houston, El Paso, and San Antonio, plays a crucial role in protecting and improving the health of Texans through education, research, and community engagement aimed at training the population health workforce of the future, conducting cutting-edge translational research to discover new ways to keep people healthy and treat disease, developing and disseminating innovative, cost-effective disease prevention programs, and using data to improve the quality and value of health care.

Support the development and application of biomedical sciences data and Artificial Intelligence (AI) to position Texas as a leader in the Big Data and AI economy. Clinical, genomic, behavioral, social, imaging, and environmental data have increased exponentially over the past decade. Recent breakthroughs in AI are transforming these data into meaningful and actionable knowledge, generating unparalleled new breakthroughs that deliver precise and personalized diagnosis, treatment, and prevention to each individual therapeutics, and optimization of patient outcomes during recovery.

The Texas Epidemic Public Health Institute (TEPHI) was authorized by SB 1780 (87R) to better prepare the state of Texas for future epidemics. The recent outbreak of H5N1 (bird flu) among dairy cows (detected in TEPHI’s wastewater monitoring program) and the rising tide of TB and drug-resistant bacteria at the border highlight the continued need for TEPHI’s work to detect new pathogens early, provide Texas-specific data, and improve public health communication with the goal of keeping Texans healthy, schools open, and the economy strong.

TEPHI leverages the resources and capabilities of UTHealth Houston’s School of Public Health to work in partnership with the Texas Department of State Health Services, the Texas Division of Emergency Management, institutions of higher education (including Texas Tech Health Science Center, TAMU School of Public Health, UT Austin, UT Arlington, UT RGV, UT El Paso, and Baylor College of Medicine), federal agencies, businesses, community partners, and local public health authorities to better prepare the state for future public health threats. TEPHI’s primary services include operating a state-of-the-art early detection system, training and maintaining a statewide public health reserve workforce and reaching rural communities through partnerships with community health workers, community colleges, and the Medical Reserve Corps, advising the private sector to ensure supply and food chain stability, and timely data analysis and visualizations.

The UTHealth School of Public Health in Brownsville (UTSPH-B), formerly the Public Health Division of the Lower Rio Grande Valley Regional Academic Health Center (RAHC) brings extensive and much-needed population health resources to the Rio Grande Valley including research, public health programming, and community and academic partnerships. The campus offers graduate certificates, masters and doctoral degree programs with 43 students enrolled. 70% of the students are employed in public health programs while they are completing their education. Faculty lead innovative research on diseases and conditions which include diabetes, obesity, cancer, tuberculosis, and stroke. The research is conducted with partners from across the region to build capacity for research and support the translation of findings into better health outcomes. Partners have included local health clinics, city and county governments, other academic institutions, and non-profit organizations. Annually, UTSPH-B brings in approximately \$6 million of federal funding to support research, hire local employees, and disseminate findings to improve health status. The research results have informed improvements in clinical care, prevention programming, and infrastructure improvements. Also, UTSPH-B has reached thousands of people each year with comprehensive prevention programming to reduce the risk of chronic diseases.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The UTHealth Medical School’s Department of Psychiatry and Behavioral Sciences proposes to continue to lead the region in clinical training, research, and patient care for persons with mental illness. UTHealth Psychiatry and Behavioral Sciences / HCPC treats more than tens of thousands of patients for a broad range of behavioral health disorders every year in inpatient and outpatient settings.

This non formula item has allowed the Department to expand clinical research and intervention efforts to identify and treat persons with mental illness and evaluate the effectiveness of treatment protocols.

As we continue to renovate and transform treatment of mental illnesses through basic and clinical research, we have a better understanding of prevention, management, and resolution.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The “Trauma and Resilience Center” at UTHealth Medical School’s Department of Psychiatry and Behavioral Sciences is an outpatient treatment, research, and clinical training center devoted to improving the mental health of Veterans and their families (spouses and children).

This non formula item has allowed the Department to expand clinical treatment, research, and educational activities to identify and treat Veterans and their families who suffer from mental illness and also to evaluate the effectiveness of treatment protocols.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Additional information for this strategy is available in Schedule 9, Non-Formula Information.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

This item provides much needed health care to indigent patients and supports graduate medical education efforts at LBJ General Hospital (LBJGH), part of the Harris County Hospital District dba Harris Health System. Harris County’s uninsured population is estimated to be 930,000 – more than any county in the nation, and an additional 600,000 persons are underinsured. These funds allow UTHHealth Houston to maintain the appropriate level of expertise, staffing, and clinical instructional programs (including residents and students) in selected medical disciplines at the Lyndon B Johnson General Hospital and to maintain primary care services at the Harris Health System Ambulatory Health Centers/Clinics.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

UTHealth Houston maintains successful education and research-based programs for the Lower Rio Grande Valley/Border Region of Texas to improve health care services for the Valley's under-served population. Funds from this special item allow UTHealth Houston to assist the Valley area in developing its own resources, both human and material, to achieve long-range goals of self-sufficiency of health care manpower and delivery of services. This Mobile Clinic provides health care services and education to colonia residents who lack access to health care. The institutional presence also allows UTHealth Houston the opportunity to recruit talented students from the South Texas region into its academic programs.

------	-------------	----------	----------	----------	---------	---------

UTHealth Houston physicians supports one of the busiest trauma centers in the nation at Memorial Hermann-TMC (MH-TMC) and have seen a 41.8 percent increase in trauma volume over the last five years, with over 12,000 adult and pediatric trauma/burn admissions/year. Trauma is the leading cause of death for persons aged 1 to 44 years, and more than 16,000 patients die from injury or violence every year in Texas.

UTHealth Houston’s Center for Translational Injury Research (CeTIR) is one of the leading trauma care research centers in the nation. Funding assists UTHealth in developing and moving its life-saving translational and clinical research to the patient population served by UTHealth Houston and MH-TMC, which can restore patients’ quality of life and ability to participate in the workforce. Injury-related research funding lags far behind other diseases such as cancer and heart disease. The best practices and treatments established at UTHealth are replicated statewide as well as implemented in the military. This funding will help sustain proper staffing levels for both the trauma center and CeTIR to maintain and further an exceptional research program and a primary driver of a learning trauma system as recommended by the National Academies for moving towards zero preventable deaths.

CeTIR’s mission is to foster and accelerate basic discovery, translational research, clinical trials and implementation of trauma research at UTHealth-Houston/Memorial Hermann Hospital.

III-202

**Estimated Appropriation and Unexpended Balance.** Included in the amounts appropriated above are: (1) estimated appropriations of amounts available for distribution or investment returns out of the Permanent Endowment Fund for the University of Texas health Science Center at Houston No. 815 and (2) estimated appropriations of the institution's estimated allocation of amounts available for distribution out of the Permanent health Funds for Higher Education No. 810.

- a. Amounts available for distribution or investment returns in excess of the amounts estimated above are also appropriated to the institution. In the event that amounts available for distribution or investment returns are less than the amounts estimated above, this Act may not be construed as appropriating funds to makeup the difference.
- b. All balances of estimated appropriations from the Permanent Endowment fund for The University of Texas Health Science Center at Houston No. 815 and of the institution's allocation from the amounts available for distribution out of the Permanent Health Fund for Higher Education No. 810 except for any General Revenue, at the close of the fiscal year ending August 31, ~~2023~~ 2025, and the income to said fund during the fiscal years beginning September 1, ~~2023~~ 2025, are hereby appropriated. Any unexpended appropriations made above as August 31, ~~2024~~ 2026, are hereby appropriated to the institution for the same purposes for fiscal year ~~2025~~ 2027.

*This rider has been changed to reflect the 2026-2027 Legislative Appropriations Request.*

4

III-202

**Unexpended Balances Between Fiscal Years: Regional Academic Health Center - Public Health.** Any unexpended balances of August 31, ~~2024~~ 2026, from the appropriations identified in Strategy E.2.1, Regional Academic Health Center-Public Health, are hereby appropriated to The University of Texas Health Science Center at Houston for the same purpose for the fiscal year beginning September 1, ~~2024~~ 2026.

*This rider has been changed to reflect the 2026-2027 Legislative Appropriations Request.*

**DESCRIPTION / JUSTIFICATION:**

UTHealth Houston School of Behavioral Health Sciences will offer exceptional education, cutting edge research, and integrated patient-centered care by offering high-level, unique quality degree programs including masters and doctoral levels, as well as distinct certifications, postdoctoral fellowships, clinical internships, and clinical fellowships to students that comprise the whole behavioral health team. For the first time in the nation, a school will jointly train psychiatrists, psychologists, nurses, counselors, social workers, the important psych techs, substance abuse therapists, and other professionals to help fill the behavioral health workforce shortage in Texas. Currently, around one-fourth of all state hospitals beds are closed due to lack of staffing and more than 80 percent of all Texas counties do not have a single child and adolescent psychiatrist.

UTHealth Houston's seventh school (UT Regent and THECB approved) will be able to consolidate our clinical resources to provide incomparable education and training to enhance the experience and exposure of our trainees by utilizing our robust inpatient and outpatient clinical settings, including over 500 inpatient beds (largest academic behavioral health complex in the nation), almost 50 hospitals statewide (including 12 state hospital sites), and dozens of outpatient clinics, in addition to telehealth services for 19 school districts, and over 500 physician offices. Enrolling students in our graduate programs will create a pipeline to significantly increase the overall number of trainees into UTHealth Houston's post graduate clinical programs, which will ultimately increase the mental health workforce across the state of Texas.

<b>FULL-TIME EQUIVALENT POSITIONS (FTE):</b>		28.00	28.00

**DESCRIPTION / JUSTIFICATION:**

House Bill 2090 passed in the 87th regular legislative session adding a new Subchapter in Chapter 38 of the Insurance Code to establish the Texas All Payor Claims Database (TX-APCD) at the Center for Health Care Data at UTHHealth Houston. The TX-APCD will collect claims and eligibility data from commercial payors, state, teacher, and local government employee health benefit plans, Medicare Advantage plans as well as Medicaid managed care organizations. This claims dataset will include medical, pharmacy, and dental claims from across the state and will include health claim information from at least January 1, 2019 onward.

Once this information is collected and additional information from traditional Medicare is included, the TX-APCD will have a dataset including over 20 million Texans. That is nearly 100% of all regulated health insurance plans, making the Center for Health Care Data and TX-APCD the largest, research accessible, health care data repository in Texas.

The CHCD is directed by House Bill 2090 (87-R) to administer the database, is authorized to engage in research and other analysis, and produce statewide, regional, and geozip consumer reports available through a public access portal that must be developed by the Center. The reports must address health care price, resource use, and quality information for policy makers, purchasers, and consumers. The TX-APCD may have the potential to help control health care costs through quality improvement, competition, and transparency in health care markets.

**EXTERNAL/INTERNAL FACTORS:**

House Bill 2090 adds Subchapter I, Chapter 38, Insurance Code that establishes the Texas All Payor Claims Database and places several obligations on the Center for Health

------	-------------	-----------	-----------

Care Data to fulfill. The legislature intended to aid in the control of health care costs through quality improvement, competition, and transparency in health care markets driven by the TX-APCD. As Texas experiences significant growth and the health care market expands in the coming years, the TX-APCD will continue to track and analyze important trends and identify outliers in cost and quality. In addition, the effort requires additional staff and information technology resources, including operational support through the Texas Advanced Computing Center (TACC) and risk insurance provided through the University of Texas System.

**PCLS TRACKING KEY:**

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

Continued salary support and related expenses needed to continue the ACPD, maintain and secure data, add new data monthly, verify that new data, build and maintain the web portals, and store the billions of records of the APCD.

**DESCRIPTION / JUSTIFICATION:**

TEPHI was created by the Texas Legislature in 2021 by SB 1780 (87R) and was funded at \$40 million/biennium with Federal ARPA funds. One of the most successful TEPHI programs is the statewide TexWEB network, which (1) acts as an early detection system for community spread of more than 3,000 pathogens and their variants, (2) establishes a long-term program to detect and monitor pathogens with potential to impact human health, including novel and emerging pathogens and variants, and (3) creates an early warning system for state leadership, DSHS, and local public health authorities. TEPHI partnered with Baylor College of Medicine, El Paso Water, and other local water utilities to establish this first-of-its-kind program to monitor wastewater across Texas for novel pathogens of epidemic potential. The communities of Athens, Austin, Baytown, Brownsville, Dallas, DFW Airport, El Paso, Fort Worth, Houston, Humble, Laredo, Lubbock, Missouri City, Brownsville, Palestine, Waco, and Wichita Falls currently participate, with new sites onboarding in partnership with DSHS.

Federal funding was requested to maintain TexWEB, but TEPHI has been excluded from the Centers Disease Control and Prevention's (CDC) national network. Participation would allow for the possibility of federal funding but would require TexWEB to report its data to Verily (CDC's sole vendor owned by Google), which would relinquish the state's control regarding how the data is used. Unlike the CDC/Verily Wastewater Monitoring program, TexWEB can detect naturally occurring or maliciously manufactured variants of pathogens. Google's Verily only test for a short, prescribed list of pathogens.

Agency name: **The University of Texas Health Science Center at Houston**

<u>CODE</u>	<u>DESCRIPTION</u>	<u>Excp 2026</u>	<u>Excp 2027</u>
-------------	--------------------	------------------	------------------

Due to challenges related to securing federal funding to maintain TexWEB and guard against emerging public health threats at our border , UTHealth Houston is requesting \$20 million for the biennium TEPHI’s TexWEB. This request fits into Border Security part of the LAR policy letters by leadership.

**EXTERNAL/INTERNAL FACTORS:**

Additional information for this strategy is available in Schedule 9.

**PCLS TRACKING KEY:**

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

Continue and expand the wastewater monitoring program, TexWEB, across the state, especially in border communities, to provide an early warning to state leadership and the Texas Department of Health Services of known or novel pathogens, whether naturally occurring or maliciously manufactured for nefarious reasons.

**DESCRIPTION / JUSTIFICATION:**

UTHealth Houston requests a Capital Construction Assistance Project (CCAP) for a new construction building on the Texas Medical Center campus called the “UTHealth Houston Education, Research, & Innovation Core Building” (UTHealth Houston ERIC Building). The request is for a \$100 million CCAP for the \$250 million+ UTHealth Houston ERIC Building. This 250,000+ square foot facility will house wet labs, research support cores, classrooms, common equipment rooms, shared support spaces, and other infrastructure for the seven schools of UTHealth Houston whose total research portfolio for fiscal year 2023 exceeded \$300 million. This new building will support advanced biomedical research, educate the next generation of medical professionals and researchers, and allow UTHealth Houston to continue its growth in education, research, and innovation.

The debt service requested assumes a 20-year level term debt at 6% consistent with the assumptions of the Texas Public Finance Authority for FY 2026 and FY 2027.

**DESCRIPTION / JUSTIFICATION:**

As students must be ready to practice upon graduation, the quality and quantity of clinical experiences a student performs during their clinical phase of education is critical to produce fully trained, competent dentists. Students receive comprehensive clinical experiences in treating all types of patients (newborn, children, adults, geriatric adults, medically complex, and veterans) through the entire continuum of oral care: urgent, disease control and prevention, and restorative care. On average, the school sees approximately 65,000 patient visits per year in its facilities. Our fees are 30 - 50% less than private practice fees. By lowering the barrier of cost for this population, it assures that our students have the necessary experiences to graduate as competent health professionals while at the same time providing essential oral health care for this population. This results in an average annual net loss of \$3 million in clinical operations which must be covered with other fund sources and consequently has downstream impacts on education, research, and the cost of education to students.

While the legislature appropriates a certain amount of general revenue to each dental school through a DCO non-formula line item, the current funding is inconsistent across the schools and lacks any metrics associated with the amount appropriated to each school. Below shows the inconsistency of the funding for all four of the Texas schools per biennium:

Texas A&M Health	\$72,700
UTHealth Houston	\$1.2 million
UT Health San Antonio	\$3.2 million
Texas Tech University Health Sciences Center El Paso	\$6 million

	<b>Total Expenditures</b>		<b>11.2%</b>		<b>\$26,004,724</b>	<b>\$232,254,525</b>		<b>12.9%</b>		<b>\$33,783,332</b>	<b>\$262,383,453</b>	

**B. Assessment of Attainment of HUB Procurement Goals**

**Attainment:**

The agency attained or exceeded zero of five, or 0% of the applicable statewide HUB procurement goals in FY 2022.

The agency attained or exceeded zero of five, or 0% of the applicable statewide HUB procurement goals in FY 2023

**Applicability:**

The "Heavy Construction" category is not applicable to agency operations in fiscal years 2022 and 2023 since the agency did not have any strategies or programs related to heavy construction.

**Factors Affecting Attainment:**

As a healthcare and research institution, each fiscal year there are sole source, and proprietary requirements, as well as existing contracts and conditions within the agency which preclude awards to other than the existing or specified contractors. We continue to research HUB potential; however, some non-availability continues in the areas of medical/research products, chemicals, blood and blood products. These types of purchases cross all purchasing categories for goods and services.

**C. Good-Faith Efforts to Increase HUB Participation**

**Outreach Efforts and Mentor-Protégé Programs:**

UTHealth Houston (UTH) is proud of the outreach efforts we've made over the last fiscal year. UTH has been a part of the Greater Houston Business Procurement Forum every month, and over the next few months will engage more with the following by joining as members and sponsoring events for National Association of Minority Contractors (NAMC), Houston Minority Supplier Development Council (HMSDC), Women's' Business Enterprise Alliance (WBEA), and the Small Business

**6.A. Historically Underutilized Business Supporting Schedule**

---

Agency Code: **744** Agency: **The University of Texas Health Science Center at Houston**

Administration (SBA). UTH currently has a mentor protege program and is always looking for more HUB vendors to get involved in this program.

**HUB Program Staffing:**

UTHealth Houston currently has a dedicated 100% FTE, HUB Manager for the HUB and Small Business Program.

**Current and Future Good-Faith Efforts:**

UTHealth Houston will continue to host an Annual HUB Vendor Expo to enhance State of Texas HUB vendors to showcase their businesses to our UTH community. HUB department meets with Procurement team on a monthly basis to ensure the opportunities are sent to the HUB community. Participation with local community colleges/universities on "How to do business with UTHealth Houston". SBA holds Matchmaking Events throughout the year in which the HUB department participates in. UTH provides input to the Texas University HUB Coordinators Alliance (TUHCA) meetings.

**Project Description**

UTHealth Houston requests a Capital Construction Assistance Project (CCAP) for a new construction building on the Texas Medical Center campus called the “UTHealth Houston Education, Research, & Innovation Core Building” (UTHealth Houston ERIC Building). The request is for a \$100 million CCAP for the \$250 million+ UTHealth Houston ERIC Building. This 250,000+ square foot facility will house wet labs, research support cores, classrooms, common equipment rooms, shared support spaces, and other infrastructure for the seven schools of UTHealth Houston whose total research portfolio for fiscal year 2023 exceeded \$300 million. This new building will support advanced biomedical research, educate the next generation of medical professionals and researchers, and allow UTHealth Houston to continue its growth in education, research, and innovation.

In addition to CCAP debt service other sources of funding would include philanthropy and revenue financing.

**Biomedical Informatics Research and Education Expansion**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2016
Year Non-Formula Support Item Established:	2016
Original Appropriation:	\$1,600,000

**(2) Mission:**

Support the development and application of biomedical sciences data and Artificial Intelligence (AI) to position Texas as a leader in the Big Data and AI economy. Clinical, genomic, behavioral, social, imaging, and environmental data have increased exponentially over the past decade. Recent breakthroughs in AI are transforming these data into meaningful and actionable knowledge, generating unparalleled new breakthroughs that deliver precise and personalized diagnosis, treatment, and prevention to each individual.

**(3) (a) Major Accomplishments to Date:**

- The Center for Precision Medicine continues to advance precision health by developing and implementing novel informatics and analytic approaches. Recent accomplishments include contributions to personalized medicine through the integration of multi-omics data and the use of Artificial Intelligence technology, leading to improved treatment efficacy and patient safety.
- The Center for Computational Systems Medicine has expanded its research to include advanced computational models for understanding the progression of neural degenerative diseases, cancer, and cardiovascular diseases. Recent projects have focused on integrating environmental and behavioral data with molecular and cellular measurements to enhance predictive models of disease onset and treatment response.
- The Center for Secure Artificial Intelligence For Healthcare (SAFE) has made strides in securing biomedical data sharing and analytics. Recent initiatives include the development of AI-driven tools for phenotyping patient data, combination drug discovery, and applications in predictive patient modeling.
- The Cancer Genomics Core (CGC) has become a vital genomics resource, supporting researchers at UTHealth Houston, the Texas Medical Center, and across the state.
- The Center for Computational Medicine has been expanded and renamed as the Center of Translational AI Excellence and Applications in Medicine (TEAM-AI) with the recruitment of a large group of internationally leading researchers from Mayo.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Over the next few years, UTHealth Houston's McWilliams School of Biomedical Informatics (MSBMI) will continue to expand its interdisciplinary research and educational initiatives, integrating expertise from the Schools of Medicine, Public Health, Nursing, Dentistry, Biomedical Sciences, and the new School of Behavioral Health Sciences. Our collaborations with other Texas institutions and the Texas Medical Center will grow even stronger, positioning Texas as a global leader in the biomedical and health sectors of the Big Data and Artificial Intelligence revolution. MSBMI will continue to leverage cutting-edge advancements in Large Language Models, machine learning, real-time analytics, and data-sharing capabilities to transform healthcare. Our centers will play a pivotal role in utilizing these breakthroughs to address current and emerging health challenges.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

N/A

---

744 The University of Texas Health Science Center at Houston

---

**(5) Formula Funding:**

None. This special item is strictly for research and does not generate formula funding.

**(6) Category:**

Research Support

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

Extramural grant funding

**(9) Impact of Not Funding:**

Big Data and AI are driving a modern revolution that continues to transform all major industries, including healthcare, fundamentally. Texas must remain a leader in this revolution to ensure continued economic viability, especially as other states make significant investments in this space (e.g., Columbia's \$100m Institute of Data Science & Engineering, University of Michigan's \$100m Institute for Data Science, MIT's \$1 billion for AI college). UTHealth Houston is uniquely positioned to lead the nation in medical AI, data science, and informatics research and application. This funding will drive advances in patient care, biomedical discovery, and population health and create jobs for Texans.

Without further funding, the research at many of the Centers would slow at a critical time when precision medicine, medical AI, and biomedical big data projects are advancing across the nation at peer institutions in other states. This would place us at a significant disadvantage in competing for new federal funding in these strategic research areas. On the personnel side, any reduction or termination of funding would affect up to several faculty positions and more than thirty other positions, potentially leading to a reduction in force for some or all these positions.

Continued investment is essential to maintain our leadership in medical AI, data science, and biomedical informatics and to ensure that Texas remains at the forefront of this rapidly evolving field.

**(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:**

Permanent

**(11) Non-Formula Support Associated with Time Frame:**

N/A

**(12) Benchmarks:**

N/A

---

**744 The University of Texas Health Science Center at Houston**

---

**(13) Performance Reviews:**

MSBMI measures the performance of these centers by the amount of extramural funding they bring into the university. To date that amount is \$111.4 million. Over the next two years, we intend to continue the rapid growth of research projects and extramural funding at these centers.

**Dental Clinic Operations**

<b>(1) Year Non-Formula Support Item First Funded:</b>	1994
Year Non-Formula Support Item Established:	1993
Original Appropriation:	\$3,923,490

**(2) Mission:**

As Texas’ oldest dental school, The UTHealth Houston School of Dentistry remains committed to improving human health by providing high quality education, patient care, service, and research in oral health for Texas, the nation, and the world.

**(3) (a) Major Accomplishments to Date:**

Each year, UTHealth School of Dentistry graduates over 100 practice ready general dentist to the state, well over 90 percent of those students remain in state. An average of 65,000 patient visits per year to at the main campus, over 89,000 visits for all owned and operated sites. Recently became a top ten dental schools in research funding nationally and number one out of all Texas dental schools. The school provides on-site care in four major Houston Hospitals, Harris Health’s Ben Taub and LBJ county hospitals, Memorial Hermann, Houston Methodist, Veterans Administration, as well as over 15 community clinics including Harris Health’s clinics.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

School of Dentistry will seek to engage and expand its presence in the community through collaboration with external Federally Qualified Health Care Clinics. Additionally, the School will partner with UT Physicians to serve the oral health care needs of UT Physicians medical population, consequently expanding our presences in the Houston metropolitan area.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

Non-Formula funding for Dental Clinic Operations, \$1,211,408 per biennium, Strategy D.1.1., Provide Health Care Support

**(5) Formula Funding:**

744 The University of Texas Health Science Center at Houston

---

**Harris County Hospital District**

<b>(1) Year Non-Formula Support Item First Funded:</b>	1990
Year Non-Formula Support Item Established:	1990
Original Appropriation:	\$1,000,000

**(2) Mission:**

This item provides much needed health care to indigent patients and supports graduate medical education efforts at LBJ General Hospital (LBJGH), part of the Harris County Hospital District dba Harris Health System. Harris County’s uninsured population is estimated to be 930,000 – more than any county in the nation, and an additional 600,000 persons are underinsured. These funds allow UTHealth Houston to maintain the appropriate level of expertise, staffing, and clinical instructional programs (including residents and students) in selected medical disciplines at the Lyndon B Johnson General Hospital and to maintain primary care services at the Harris Health System Ambulatory Health Centers/Clinics.

**(3) (a) Major Accomplishments to Date:**

UTHealth Houston faculty, along with undergraduate and graduate medical education trainees, provide care to many of Harris Health System’s primary care and subspecialty care settings and LBJ General Hospital. Residents in clinical rotations increased from 226 to 255 between FY2013 and FY2023. In Harris Health System facilities, faculty participated in more than 150 research studies and improved care according to Det Norske Veitas Healthcare NIAHO accreditation program (DNV) core quality indicators. Per the Thompson-Reuters Solucient database, LBJ operates with lower mortality, fewer complications, and lower cost than comparative hospitals while operating at the expected length of stay.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

A Quality Improvement Program will continue at LBJGH. UTHealth Houston will incorporate Resident Quality Training that will include new curriculum and trainee involved quality projects that will include faculty and Harris County Hospital District employee participation. A major goal of this Quality Program is to create a Quality Fellowship to help further the program. Additionally, Harris County voters approved a large bond to build a brand new LBJGH next door to the existing 1989 hospital. This larger hospital will be a Level I Trauma Center, only the third Level I Trauma Center in the region (standards would encourage seven centers). UTHealth Houston and our partners at Harris Health are planning future education and resident/fellow training opportunities in this larger hospital to help fill the physician shortage in Texas and opportunities in behavioral health at the old facility.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

N/A

**(5) Formula Funding:**

N/A

**(6) Category:**

Healthcare Support

---

744 The University of Texas Health Science Center at Houston

---

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

Various sources for GME resident funding and stipends.

**(9) Impact of Not Funding:**

Loss of these funds will severely hamper UTHealth Houston's ability to provide quality care to indigent Texans in Harris County who cannot otherwise afford care, particularly at a time of great need during COVID-19. Further, critically needed medical student rotations and resident GME positions would be severely reduced or eliminated. The Harris Health System through LBJ Hospital and its associated clinics provides an important contrast of experience and clinical pathology compared to other Medical School associated hospitals and provides significant service to the community. Not funding would likely lead to an erosion of the clinical spectrum that Medical School's trainees experience, and to fewer trainees and subsequent loss of physicians in Texas.

LBJ Hospital provides the setting for the clinical rotation of all 480 third and fourth year McGovern Medical School students and 255 residents and fellows annually. The item is critical to recruiting and retaining physicians in Texas and providing quality medical care to local communities. We would be unable to support medical student and residency programs without this funding given the cost of extensive external regulatory body requirements related to these programs.

**(10) Non-Formula Support Needed on Permanent Basis/Discontinuu**

Permanent

**(11) Non-Formula Support Associated with Time Frame:**

N/A

**(12) Benchmarks:**

N/A

**(13) Performance Reviews:**

We are expecting to fill 100% of the GME slots for this coming fiscal year.

---

**744 The University of Texas Health Science Center at Houston**

**Improving Public Health in Texas Communities**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2010
Year Non-Formula Support Item Established:	2010
Original Appropriation:	\$4,750,000

**(2) Mission:**

According to the Texas Comptroller, health care costs account for nearly half of the State’s budget and are increasing at a faster pace than population growth and inflation. These costs are largely driven by the growing prevalence of chronic disease, something that clinical care is ill equipped to address on its own. In fact, economic and behavioral factors determine an estimated 80 percent of health outcomes. In addition to chronic disease, Texas faces public health, safety and economic challenges related to disaster preparedness and emerging (and re-emerging) infectious diseases due to high-consequence pathogens.

Addressing chronic disease and supporting public health requires a robust and well-trained workforce and infrastructure that can bridge the gap between the fields of public health and medicine and work with and in communities to promote population health. The UTHealth Houston School of Public Health (UTSPH), with locations in Austin, Brownsville, Dallas, Houston, El Paso, and San Antonio, plays a crucial role in protecting and improving the health of Texans through education, research, and community engagement aimed at training the population health workforce of the future, conducting cutting-edge translational research to discover new ways to keep people healthy and treat disease, developing and disseminating innovative, cost-effective disease prevention programs, and using data to improve the quality and value of health care.

**(3) (a) Major Accomplishments to Date:**

UTSPH has accomplished the goal of increasing student enrollment by 25% and sustaining its enrollment in excess of 1,300 students. The UTSPH is also disseminating effective prevention programs to more than a million young Texans annually. According to the US News and World Report, the UTSPH is ranked in the top 10 for public schools of public health and is the top ranked school in Texas. Year over year, the UTSPH has the top ranked program in healthcare management. The UTSPH collaborates with higher education institutions across the state and has joint MPH programs with schools of medicine, dentistry, nursing, informatics, social work, law, and business throughout Texas, which ensures that practitioners and professionals from many sectors will be prepared to solve the complex health and public safety issues affecting Texas.

The UTSPH has been a stalwart in the fight against emerging infectious diseases in our state, thus keeping Texans healthy and the Texas economy strong. Using the latest monitoring methods UTSPH faculty are leading efforts to fend off the tide of emerging infectious agents and antimicrobial resistance at the Texas-Mexico border, due at in part to migration up from Central and South America and easy availability of over-the-counter antibiotics in Mexico.

The School has the nation’s top-rank program in healthcare management and its faculty identify policy and practice changes to improve quality outcomes while saving costs and increasing transparency.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

---

**744 The University of Texas Health Science Center at Houston**

---

With this funding, the UTSPH will expand its reach and impact by developing and expanding its cost-effective professional and continuing education programs that train the existing workforce and provide meaningful professional training to meet the health and safety needs of Texas. In a recent independent survey of the greater Houston region, public health was the greatest training need to fill open and emerging jobs. Moreover, the UTSPH will continue to upgrade its training so that health care professionals can efficiently and effectively operate in the new health care economy while providing the most effective prevention strategies to the population. The UTSPH will use state-of-the-art technology to deliver hands-on and virtual training experiences that are interactive, immersive, and effective in meeting the population health training needs of the State of Texas. These experiences will be aligned with industry and local and state government needs and offer lifelong training to address rapid and complex changes in our world and in our economy. Currently, the UTSPH is exploring new programs in disease prevention and control, implementation science, the business of health, data science, and emergency and pandemic preparedness.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

N/A

**(5) Formula Funding:**

HRIs receive effective funding of less than \$0.50 on the dollar than they did in FY2000-2001 for the I&O Formula and do far worse in the other main formula funds. Formula funding has not kept pace with the cost of education. Further, the SPH does not have a practice plan, a hospital, or other revenue generators that other professional degree granting schools do. Therefore, this non-formula item is critical to continue to fund these students, plus the continuing education/workforce development projects, and disease and disaster response.

**(6) Category:**

Public Service

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

Extramural research grant funding

**(9) Impact of Not Funding:**

Funding elimination or reduction would limit the ability of UTSPH to train a variety of workers, including first responders and health professionals, including those engaged in the state's response to emerging infectious disease and border and rural health. This would result in an insufficient, less knowledgeable, and less competent workforce, at a critical time for public health. Additionally, UTSPH is heavily involved in maternal-child health programs throughout the state and plays a critical role in maximizing the impact of State healthcare expenditures (e.g. ERS). Reductions in funding, therefore, would ultimately increase overall health care costs in the State of Texas.

The population of Texas is young and the time for disease prevention is now to reduce the risk of obesity, heart disease and cancer. Similarly, with its long border with Mexico, international airports and huge port facilities, there are fast growing needs in disaster preparedness and increased readiness for emerging infectious diseases. Any reduction in funding would come at a critical and unfortunate time for the health of Texas.

---

**Institutional Enhancement (Academic and Student Support)**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2000
Year Non-Formula Support Item Established:	2000
Original Appropriation:	\$1,000,000

**(2) Mission:**

Institutional Enhancement funding plays a significant role in financing the core mission of all health related institutions by providing a base level of funding for each institution’s services and programs. Institutional Enhancement funding helps support leading edge and innovative programs in research and education not otherwise supported by formula funding.

**(3) (a) Major Accomplishments to Date:**

UTHealth Houston was able to allocate these funds to augment formula and non-formula sources. Activities included student services and academic programs, investments in equipment, and other infrastructure needs, including research infrastructure support.

These funds have helped in some measure to maintain UTHealth Houston’s status as the largest (measured by FTSEs) and most comprehensive health related institution in not only Texas, but the Southwestern United States. Additionally, these institutional enhancement funds help UTHealth Houston meet some of the rules and reporting requirements that are required by federal and state agencies.

These funds also help keep tuition low for our students. Each of UTHealth Houston’s seven schools boasts some of the lowest tuition and debt after degree costs in the nation. The more than 5,000 students at UTHealth Houston will enjoy some of the lowest debt after graduate costs in the nation.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

UTHealth will continue to supplement funding for its academic, research, and infrastructure activities to support the over 5,000 students and 2,500 faculty in more than seven million square feet of state-of-the-art spaces across 127 buildings.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

**Integrated Care Study for Veterans with Post-traumatic Stress Disorder**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2018
Year Non-Formula Support Item Established:	2018
Original Appropriation:	\$4,000,000

**(2) Mission:**

The “Trauma and Resilience Center” at UTHealth Medical School’s Department of Psychiatry and Behavioral Sciences is an outpatient treatment, research, and clinical training center devoted to improving the mental health of Veterans and their families (spouses and children).

This special item has allowed the Department to expand clinical treatment, research, and educational activities to identify and treat Veterans and their families who suffer from mental illness and also to evaluate the effectiveness of treatment protocols.

**(3) (a) Major Accomplishments to Date:**

TRC serves as a statewide leader in research and treatment of trauma-related mental health needs for Veterans and their families and continues to provide clinical services both onsite and through telehealth. With a robust team of clinicians, researchers, and trainees, TRC also continues to collaborate with partners like Houston Methodist Hospital’s Psychiatry Department military special warfare operators program, Commissioners Court, Healthcare for the Homeless, Harris Center, Harris Health and others. Through our online patient assessment system patients can be assessed for intake and biweekly monitoring in order to track the impact of their treatment plan.

- TRC additional recruits, expansion of new programs;
- Contracts and grants, \$325k total funds
- Continued support for Peer-to-peer treatment for First Responders suffering from PTSD
- Treatment for Pain and PTSD using tDCS + Prolonged Exposure
- Treatment for Victims of Mass Violence Events
- Integrating Peers in Evidence Based Treatment for Veterans and Active-Duty personnel with PTSD
- Center for Violence Prevention focuses on reducing the burden of violence as a result of PTSD

- New Collaborations & Referral Agreements:
- Baylor College of Medicine and UTHealth Houston fMRI Lab
- Department of Defense / VA Strong Star San Antonio Consortium
- Bob Woodward Foundation
- Combined Arms Veterans Coordinating Services
- Houston Fire Department
- Houston Department of Veterans Affairs

---

744 The University of Texas Health Science Center at Houston

---

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Over the next two years, the Trauma and Resilience Center at the Department of Psychiatry will continue to study and deliver best treatments, protocols, and diagnostic assessment tools for Veterans, Active-Duty Personnel, and Family Members, and Civilians who have experienced traumatic events, in partnership with HHSC. Will also expand our telehealth programs, services, and research/education activities to a statewide footprint across Texas in collaboration with local mental health authorities to reach veterans across the state of Texas in rural areas. We will continue to apply for DOD, NIH and federal grant funding and publish in peer reviewed journals. TRC will continue to expand efforts to identify and address the mental healthcare needs of Veterans and their families in the greater Houston area and all of Texas.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

**(5) Formula Funding:**

N/A

**(6) Category:**

Research Support

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

Federal grants

**(9) Impact of Not Funding:**

Continuation of funding is critical to maintain the faculty and programs (treatment, research, education) started under this new special item funding. Without continued state funding, these programs for Veterans may not continue. The care of Veterans and their families with mental illness will not improve without new knowledge and treatments determined through effective research protocols. In light of the State and Nation's mounting costs in mental health hospitals and community care, research is necessary to contribute to improve the efficiency and effectiveness of care for Veterans, their families, and for other traumatized populations. We are also working on a program to introduce Stress Inoculation Training, a type of cognitive behavioral therapy, which will help teach coping skills to our active military to manage and deal with PTSD symptoms.

---

744 The University of Texas Health Science Center at Houston

---

**Psychiatry and Behavioral Sciences Research**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2014
Year Non-Formula Support Item Established:	2014
Original Appropriation:	\$6,000,000

**(2) Mission:**

The UTHealth Medical School’s Department of Psychiatry and Behavioral Sciences proposes to continue to lead the region in clinical training, research, and patient care for persons with mental illness. UTHealth Psychiatry and Behavioral Sciences / HCPC treats more than tens of thousands of patients for a broad range of behavioral health disorders every year in inpatient and outpatient settings.

This special item has allowed the Department to expand clinical research and intervention efforts to identify and treat persons with mental illness and evaluate the effectiveness of treatment protocols.

As we continue to renovate and transform treatment of mental illnesses through basic and clinical research, we have a better understanding of prevention, management, and resolution.

**(3) (a) Major Accomplishments to Date:**

---

**744 The University of Texas Health Science Center at Houston**

---

UTHealth has continued to recruit faculty, thus increasing our overall number of proposal applications, awards, publications, trainees, and community participation. We have expanded our reach to enhance child & adolescent psychiatry, trauma focused treatment, psychosis, treatment resistant depression and psychosocial effects of disasters and pandemics. With the use of telemedicine, we have been able to recruit more patients for research and clinical services within the state.

- successfully recruited 21 faculty, 11 post-doctoral fellows, 15 psychology interns
- 198 peer reviewed articles
- 334 research proposals submitted
- 68 grants awarded

**Programs:**

- Center for Healthy Aging examines the interaction of behavioral syndromes in neurological and neurodegenerative diseases.
- Brain Bank Program studies how brain function regulates behavior
- fMRI Lab conducts translational research on brain structure and function
- Translational Psychiatry Program example is biomarkers in bipolar disorder
- Psychological Intervention Research Program for Mood Spectrum Disorders
- Neuroimmune Interactions in Depression, Addiction and Pain program
- Refractory Mood Disorders Program
- Interventional Psychiatry Center
- Early onset Psychosis
- Center for Lifespan Autism Research, Treatment and Education
- Center for Affective Neuromodulation and Computation (CAN-C)
- Center for Sensory and Systems Psychiatry (CSSP)

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Over the next two years, the Department of Psychiatry will continue to expand the programs and services listed above with the team of leading clinician/scientists recruited and supported by special item funds. We will continue to apply for NIH and federal and private grant funding at every opportunity, and impact mental health science nationally by publishing high-quality research in peer reviewed journals. UTHealth Houston Psychiatry and Behavioral Sciences will expand ongoing and new efforts to focus the pressing mental health needs of our time, including the growing opioid crisis, early identification and intervention of mental illness in children, and the mental health needs trauma survivors and their families. We will continue our efforts in the development of our brain bank and psychiatric genetics program and will expand neuromodulation research to develop new treatments and increase understanding of neural mechanisms and effective interventions in treatment-resistant severe mental illnesses.

---

**(6) Category:**

Research Support

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

Extramural research grant funding

**(9) Impact of Not Funding:**

The continuation of funding is critical to maintain the level of researchers, programs, and centers that have made important groundbreaking and distinguished contributions under this special item funding. Federal grant funding has continued to decline significantly at all levels, threatening both continuity and further innovation for research. Without continued state funding, these programs may not continue. The quality of life in those with mental illness and the corresponding public health and criminal justice burdens will not improve without new knowledge and refined treatments driven by high-level support. Considering the State's mounting costs in mental health hospitals and community care, battling the opioid crisis, dealing with the coming surge in need for mental health and substance misuse needs that will accompany the critical state-wide shortage in child and adolescent psychiatric care, continued research is necessary to contribute to improve the rate of discovery and effectiveness of care.

**Regional Academic Health Center – Public Health**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2006
Year Non-Formula Support Item Established:	2006
Original Appropriation:	\$454,889

**(2) Mission:**

The UTHealth School of Public Health in Brownsville (UTSPH-B), formerly the Public Health Division of the Lower Rio Grande Valley Regional Academic Health Center (RAHC) brings extensive and much-needed population health resources to the Rio Grande Valley including research, public health programming, and community and academic partnerships. The campus offers graduate certificates, masters and doctoral degree programs with 43 students enrolled. 70% of the students are employed in public health programs while they are completing their education. Faculty lead innovative research on diseases and conditions which include diabetes, obesity, cancer, tuberculosis, and stroke. The research is conducted with partners from across the region to build capacity for research and support the translation of findings into better health outcomes. Partners have included local health clinics, city and county governments, other academic institutions, and non-profit organizations. Annually, UTSPH-B brings in approximately \$6 million of federal funding to support research, hire local employees, and disseminate findings to improve health status. The research results have informed improvements in clinical care, prevention programming, and infrastructure improvements. Also, UTSPH-B has reached thousands of people each year with comprehensive prevention programming to reduce the risk of chronic diseases.

**(3) (a) Major Accomplishments to Date:**

- secured more than \$103 million in external funding, including research and population health and delivery system reform funds over two decades.
- The campus faculty have published 280 peer-reviewed papers on health conditions in the region with nearly 40 research collaborators from around Texas and beyond.
- Cameron County Hispanic Cohort. More than 5,000 Mexican American participants over a 15-year period, providing unparalleled insight into the genetic, biological, clinical and psychosocial factors influencing the health of Mexican Americans living on the border.
- Tuberculosis Cohort. This study includes adult and elderly people from Texas and Mexico with active tuberculosis, latent tuberculosis infection, or controls.
- Healthy Living Interventions. Programs to support interventions that improve overall health outcomes in cities across Cameron and Hidalgo Counties. Examples include interventions to improve levels of physical activity and healthy food choice, which have contributed to reduced rates of obesity and diabetes in the region and to Brownsville winning the Robert Wood Johnson Foundation Culture of Health Award in 2014.
- Increased student population. Our student population has grown significantly over the last several years, resulting in undergraduate to doctoral level training in public health for this underserved region.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

UTSPH-B will continue to expand our research and intervention to other cities in the region, to conduct more research into the nature of health issues in our population in collaboration with UTRGV and our collaborators across Texas. We will also expand interventions in the region to address obesity and diabetes.

**Service Delivery in the Valley/Border Region**

<b>(1) Year Non-Formula Support Item First Funded:</b>	1986
Year Non-Formula Support Item Established:	1986
Original Appropriation:	\$216,816

**(2) Mission:**

UTHealth Houston maintains successful education and research-based programs for the Lower Rio Grande Valley/Border Region of Texas to improve health care services for the Valley's under-served population. Funds from this special item allow UTHealth Houston to assist the Valley area in developing its own resources, both human and material, to achieve long-range goals of self-sufficiency of health care manpower and delivery of services. This Mobile Clinic provides health care services and education to colonia residents who lack access to health care. The institutional presence also allows UTHealth Houston the opportunity to recruit talented students from the South Texas region into its academic programs.

**(3) (a) Major Accomplishments to Date:**

The Mobile Health Clinic project has provided services and education in both Hidalgo and Cameron Counties. In 2007, UTHealth entered into an exclusive agreement with Cameron County for delivery of services to their underserved residents earning it a "Texas County Award" for outstanding health care services to border residents. The Mobile Clinic provides health care services to colonia patients, including Pap smears, immunizations, and lipid and glucose screenings. It provides quarterly clinical rotations for UTHealth Houston's fourth year medical students. During these visits the students do health screenings and provide educational sessions in healthy cooking and lifestyle changes. The Mobile Van, using telemedicine and its association with the UTHealth Houston Department of Internal Medicine, allows patients to be treated for various medical conditions limiting patient trips to the emergency room. The mobile clinic partners with the UTHealth Houston School of Public Health Brownsville Campus to expand clinical research that is specific to the Hispanic community.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

The team hopes to expand services to other locations in Health Professions Shortage Areas in Cameron County to catch even more patients that are lacking healthcare services. The team will continue screenings for hypertension, diabetes, and obesity, and to educate and treat indigent patients with these conditions, and expand our research to include more patients from the colonias. Due to the rural locations of the colonias these patients are often not included in important studies that directly affect their community which can contribute to health care disparities.

The team is exploring opportunities with our UTHealth Houston School of Dentistry about expanding our coverage to provide dental services as well. Just as important, the mobile clinic will serve as a teaching site for our medical students with the hopes that exposure to this patient population will encourage them to eventually practice in this community or similar underserved communities in Texas. To track the location of mobile clinic, go to <https://med.uth.edu/internalmedicine/mobile-health-clinic/>.

---

**744 The University of Texas Health Science Center at Houston**

**Texas All Payors Claim Database**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2026
Year Non-Formula Support Item Established:	2026
Original Appropriation:	\$9,000,000

**(2) Mission:**

House Bill 2090 (87-R) established the TX-APCD to be a valuable resource for the general public, consumers, and policy makers to help make informed decisions about the cost and quality of health care, ultimately reducing costs and improving health outcomes. The TX-APCD will house claims and eligibility data from commercial payors, state, teacher, and local government employee health benefit plans, Medicare Advantage plans and Medicaid managed care organizations. The dataset will include medical, pharmacy, and dental claims. To aid consumers in health care decision-making the TX-APCD is to develop a public access portal to provide information on the aggregate costs of health care and the quality of health care on a regional basis. The TX-APCD is also to provide aid qualified research entities (examples: 501(c)(3) organizations, institutions of higher learning, and health care providers in the state) in using the resources of the database to create useful reports and studies.

**(3) (a) Major Accomplishments to Date:**

Center for Health Care Data (CHCD) began regular meetings with the Texas Department of Insurance (TDI) to begin work on highly technical regulations. Those regulations were successfully adopted by the Commissioner of Insurance on May 26, 2022. CHCD staff began accepting applications from stakeholders and interested persons for the purpose of serving on the Stakeholder Advisory Group (“Advisory Group”) which is required by H.B. 2090 (87-R). The Advisory Group was established in December 2021 and the successful applicants were notified. By the end of January 2022, the CHCD obtained a license to utilize the APCD Council Common Data Layout (CDL) for health claims submission.

The TX-APCD began receiving monthly data submissions from payors in July 2023. In addition to monthly submissions a one-time submission period for historical data (for a data period beginning January 1, 2019 to the first monthly submission). Thus, by the end of the 2023, the TX-APCD had gathered data spanning from January 1, 2019 to the present for over 15 million covered individuals. This means that claims data for just under 65% of all covered persons held by the TX-APCD. As of May 2024, the TX-APCD has almost 6 billion rows of data collected from over 19,500 submitted data files.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

It is expected that over the next two years, the TX-APCD will successfully receive and analyze claims data from the submitters. The data received by the TX-APCD is undergoing substantive review to ensure the validity of the dataset. To make this information valuable to the public, researchers, policy makers, and others, a master provider registry and master patient index are both undergoing development. These indexes are necessary to permit analysis of the data without improper double-counting of individuals. It also permits studies of health care across time and payor. In addition, TX-APCD will issue a report to the legislature each biennium, as required by statute. With funding, the TX-APCD will also begin development of the public web portal to access aggregate costs of health care and the quality of health care on a regional and statewide basis.

744 The University of Texas Health Science Center at Houston

---

**Texas Epidemic Public Health Institute**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2022
Year Non-Formula Support Item Established:	2022
Original Appropriation:	\$40,000,000

**(2) Mission:**

The Texas Epidemic Public Health Institute (TEPHI) was authorized by SB 1780 (87R) to better prepare the state of Texas for future epidemics. The recent outbreak of H5N1 (bird flu) among dairy cows (detected in TEPHI’s wastewater monitoring program) and the rising tide of TB and drug-resistant bacteria at the border highlight the continued need for TEPHI’s work to detect new pathogens early, provide Texas-specific data, and improve public health communication with the goal of keeping Texans healthy, schools open, and the economy strong.

TEPHI leverages the resources and capabilities of UTHealth Houston’s School of Public Health to work in partnership with the Texas Department of State Health Services, the Texas Division of Emergency Management, institutions of higher education (including Texas Tech Health Science Center, TAMU School of Public Health, UT Austin, UT Arlington, UT RGV, UT El Paso, and Baylor College of Medicine), federal agencies, businesses, community partners, and local public health authorities to better prepare the state for future public health threats. TEPHI’s primary services include operating a state-of-the-art early detection system, training and maintaining a statewide public health reserve workforce and reaching rural communities through partnerships with community health workers, community colleges, and the Medical Reserve Corps, advising the private sector to ensure supply and food chain stability, and timely data analysis and visualizations.

**(3) (a) Major Accomplishments to Date:**

TEPHI trained more than 4,000 Texans through newly developed programs, including a free online preparedness certificate for local and state public health workers and community colleges students, a webinar series targeting Texas business sector pandemic preparedness, a grand rounds webinar series on emerging infections in Texas, infectious disease training for rural health systems, and integrated pandemic preparedness training for community health workers.

TEPHI has also partnered with Baylor College of Medicine, El Paso Water, and other local water utilities to establish a first-of-its-kind program to monitor wastewater across Texas for novel pathogens of epidemic potential. This innovative testing program provides an early warning system for new public health threats. Athens, Austin, Baytown, Brownsville, Dallas, DFW Airport, El Paso, Fort Worth, Houston, Humble, Laredo, Lubbock, Missouri City, Brownsville, Palestine, Waco, and Wichita Falls currently participate, with new sites onboarding in partnership with DSHS.

TEPHI partnered with DSHS to establish and expand the Texas Coronavirus Antibody Response Survey (Texas CARES) to estimate the overall degree and longevity of immunity and the impact of long-COVID on our state. TEPHI, in collaboration with DSHS and other institutions, has launched a statewide SARS-CoV-2 emerging variant program to detect and monitor new variants of concern.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

---

**744 The University of Texas Health Science Center at Houston**

---

TEPHI will expand targeted trainings in pandemic preparedness for rural hospitals, community health workers, and entities critical to the food supply chain, as well as adding training for public health officials on how to use wastewater data effectively. TEPHI will also expand its early detection and monitoring programs statewide in collaboration with local public health, municipal utilities and Health Information Exchanges to expand geographic representation (especially along the border) and monitor for drug-resistant bacteria and pathogens of concern. TEPHI will expand its variant sequencing program (i.e. how a virus changes over time) into other critical viruses in collaboration with other institutions of higher education, especially the health-related institutions. TEPHI will also implement an innovative, fact-based public health communication program to improve public education and awareness for epidemic prevention and pandemic preparedness in collaboration with the Moody Center for Health Communication at UT Austin.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

Federal funds through ARPA.

**(5) Formula Funding:**

None

**(6) Category:**

Research Support

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

\$4M in ARPA funding is available in FY26 to offset the annual \$12M TEPHI budget.

**(9) Impact of Not Funding:**

TEPHI would discontinue operations. The cutting-edge early detection network that has been recognized for its groundbreaking efforts in wastewater monitoring would be dismantled, and the state would have to rely solely on federal monitoring efforts operated by their sole contractor, Google's Verily, that use less advanced technology and offer little state control of data. Texas will be vulnerable to emerging infectious agents that could result in disease and mortality as well as significant economic loss. Texas's long border with Mexico makes us particularly vulnerable to emerging viral infections from across the globe, as well as the introduction of drug-resistant bacteria strains due to Mexico's policy of making antibiotics available over-the-counter.

**Trauma Care**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2012
Year Non-Formula Support Item Established:	2012
Original Appropriation:	\$500,000

**(2) Mission:**

UTHealth Houston physicians supports one of the busiest trauma centers in the nation at Memorial Hermann-TMC (MH-TMC) and have seen a 41.8 percent increase in trauma volume over the last five years, with over 12,000 adult and pediatric trauma/burn admissions/year. Trauma is the leading cause of death for persons aged 1 to 44 years, and more than 16,000 patients die from injury or violence every year in Texas.

UTHealth Houston's Center for Translational Injury Research (CeTIR) is one of the leading trauma care research centers in the nation. Funding assists UTHealth in developing and moving its life-saving translational and clinical research to the patient population served by UTHealth Houston and MH-TMC, which can restore patients' quality of life and ability to participate in the workforce. Injury-related research funding lags far behind other diseases such as cancer and heart disease. The best practices and treatments established at UTHealth are replicated statewide as well as implemented in the military. This funding will help sustain proper staffing levels for both the trauma center and CeTIR to maintain and further an exceptional research program and a primary driver of a learning trauma system as recommended by the National Academies for moving towards zero preventable deaths.

CeTIR's mission is to foster and accelerate basic discovery, translational research, clinical trials and implementation of trauma research at UTHealth-Houston/Memorial Hermann Hospital.

**(3) (a) Major Accomplishments to Date:**

- CeTIR provides the research infrastructure to 24 clinician-scientists in Trauma/Burn care. This infrastructure includes 24/7/365 clinical research assistant staffing for clinical trial enrollment and research laboratory assays
- UT System developed the Trauma Research and Combat Casualty Care Collaborative (TRC4) which is a collaboration between the UT System component institutions with an interest in Trauma/Burn research and care and the Department of Defense. UTHealth Houston has a leadership role as the largest clinical center and submitted the most applications to the initial funding initiative and received the most awards
- disseminated acute care surgery guidelines to other Level 1 centers statewide
- led and continuing the regional deployment of UTHealth Houston designed tourniquets
- Recently completed two trials of autologous cell therapies for severe traumatic brain injury in adults and children
- A model study to examine different treatment strategies for pain in order to prevent opioid addiction among trauma patients
- recently completed enrollment in a clinical trial to understand biomarkers of severe TBI that predict rapid deterioration
- recently completed enrollment of first two cohorts of patients using an off the shelf adult stem cell product to reduce the inflammatory consequences of trauma and resuscitation from hemorrhagic shock
- recently completed a clinical trial to evaluate the efficacy of a multi-modal pain management program to reduce opioid exposure

---

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

Research will continue to focus on pre-hospital and other early interventions and treatments. Findings from pre-hospital studies could potentially result in decreased costs for patients and the state, as well as accurate allocation of hospital resources through improved triage. Currently, we are evaluating the use of pre-hospital whole blood resuscitation vs. component therapies in adults; a similar trial is being initiated in children and is funded by BARDA. Another pre-hospital trial designed to limit the impact of hemorrhagic shock is TAP (Trauma and Prothrombin complex). This study infuses a group of clotting factors designed to reduce blood loss after traumatic injury and improve survival. We have numerous ongoing clinical trials, with one of the most important addressing the issue of post-injury venous thromboembolic events. TRAIT (a trial of Anti-thrombin III) seeks to reduce the risk of post injury blood clots using a novel strategy with intellectual property developed by faculty at UTHealth Houston. A clinical trial planning grant to evaluate genetic polymorphisms that influence TBI outcome and are targets of existing drugs was funded by TRC4 and is currently being developed within the collaborative. The trauma vascular registry PROOVIT (Prospective Observational Vascular Injury Trial) and the pediatric counterpart are being moved to and developed at UTHealth Houston as part of the TRC4 program.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

UTHealth received a post-Hurricane Ike emergency supplemental appropriation in 2009 of \$6 million.

**(5) Formula Funding:**

N/A

**(6) Category:**

Research Support

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

Extramural research grant funding

**(9) Impact of Not Funding:**

UTHealth is in a distinctive position to lead the nation in trauma research, discovery, and patient care. This funding will help push translational research from labs to the patient and help maintain the staffing levels to handle increases in trauma volume as the population in the region increases. The trauma volume at UTHealth's partner hospital has increased by 41.8 percent in the last five years. Without this funding, Texas will miss out on an important opportunity to be the hub of trauma research nationally, provide life-saving therapeutics to Texans that maintain their quality of life and contribution to society, and maintain the proper staff levels to prevent temporary closures of the trauma center to new patients when the trauma center's capacity exceeds safe levels. Without this funding, military trauma care will suffer as well.

**UTHealth Houston School of Behavioral Health Sciences**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2026
Year Non-Formula Support Item Established:	2026
Original Appropriation:	\$10,500,000

**(2) Mission:**

The UTHealth Houston School of Behavioral Health Sciences (SBHS) will provide unique quality degreed programs including masters and doctoral level, in addition to distinct certifications, postdoctoral fellowships, clinical internships and clinical fellowships to enhance the experience and exposure of our trainees by consolidating our resources to utilize our robust inpatient and outpatient clinical settings, while applying research to transform treatment of mental illness. The SBHS will expand degree offerings and subspecialties (forensic, child and adolescent, addiction, autism, trauma, marriage and family, PTSD, geriatric, sports medicine, etc.), improve the educations experience and quality, and increase the workforce across the state of Texas, and the nation.

**(3) (a) Major Accomplishments to Date:**

UTHealth Houston has planned an organizational structure that will be used to implement SBHS, including identifying faculty who will provide support to create curriculum to develop courses and assist with implementation and training of new faculty to be recruited. UTHealth Houston has been able to collaborate with other schools on campus, to discuss dual degree programs, extended fellowships, and postdoctoral interdisciplinary research. In addition, UTHealth Houston identified community partners to expand programs offered at their local institutions to further the education and enhance the opportunity for growth and expansion of mental health providers across the lifespan.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

SBHS will create course curriculum and initiate the review and approval process required to obtain accreditation for each of the degreed programs we will offer. SBHS will recruit core teams to provide education for each of the programs. SBHS will begin marketing campaigns to generate momentum for enrollment and work with local and state-wide undergraduate institutions to collaborate to solicit students.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

N/A

**(5) Formula Funding:**

None at this time, expect some new formula funding, but HRI formula funding is sufficient for this new, unique, innovative school.

**(6) Category:**

Instructional Support

**(7) Transitional Funding:**

N

---

744 The University of Texas Health Science Center at Houston

---

**(8) Non-General Revenue Sources of Funding:**

Limited student tuition funding, want to keep the cost low to encourage the workforce development.

**(9) Impact of Not Funding:**

With Texas booming population, the shortage of mental health providers will continue to grow unchecked compared to demand if the SBHS is not funded. This will further hamper access to care for Texans, increasing the overall risk of mental health related issues including criminal justice involvement, harm to self or others, and missing the window of early intervention that is key to successful treatment. UHealth Houston is offering a solution to the provider shortage that could become a model for other health related institutions of higher education to follow that will make Texas model for behavioral health care.

**(10) Non-Formula Support Needed on Permanent Basis/Discontinuu**

Permanent

**(11) Non-Formula Support Associated with Time Frame:**

N/A

**(12) Benchmarks:**

N/A

**(13) Performance Reviews:**

Depending on funding and degree offerings initiated, the performance review would be the number of students enrolled in the school.
